ioTORQ

## Advanced utility and process optimization software

By integrating multiple data sources and AI-driven analytics, ioTORQ provides real-time dashboards to engage stakeholders and maximize performance gains.

Maximize cost savings, avoid losses, reduce risk and improve environmental compliance with our locally deployed or fully hosted software solution.

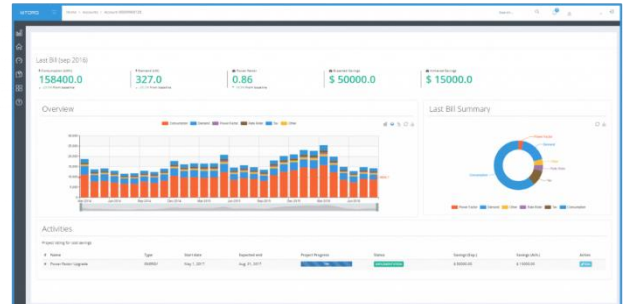

ioTORQ Applications

Energy & Resource Management

Flexible dashboards, advanced target setting, alerting & action tracking combine to maximize savings potential.
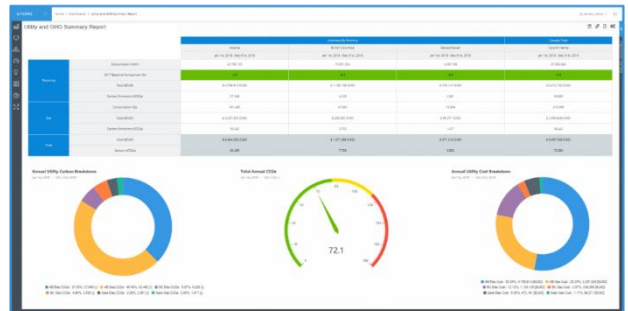

Utility Bill Management

Automatic utility bill processing, error checking, rate optimization and procurement insights.

Lean Manufacturing

Track production, record equipment issues and reveal continuous improvement opportunities.

Corporate Reporting

Monitor emissions, manage waste, ensure compliance and generate auditable carbon reports.
