

Archive Shuttle for Archive Migrations to Office 365

Third-party email archives are a massive headache. They are prone to downtime, difficult to manage, and expensive to maintain. You can eliminate that headache—and save a lot of money—by bringing your data home to Office 365.

Introducing Archive Shuttle

Archive Shuttle liberates data from third-party email archives with zero impact on end users and IT services while also meeting stringent requirements for data integrity and security.

Peace of mind. Happy users. Reduced risk.

- Eliminate an expensive, difficult-to-maintain data silo
- Bring ALL your data home to Office 365 to maximize your employees' productivity
- Improve your security posture and your ability to meet discovery and compliance requirements by bringing ALL your data under management by Office 365's advanced discovery and data governance capabilities

Liberate your data from your on-premises archive

- Full chain-of-custody, logging, and audit with retention category mapping
- Apply filters, clean up shortcuts, handle leavers' data automatically

Get migrating in hours rather than weeks with cloud-based deployment and fully-managed migration services

Trusted by large enterprises all over the world

- Archive Shuttle is being used today in virtually every large enterprise-scale PST migration project on the planet

Globally scalable, centrally managed

Bring ALL your data home to Microsoft Office 365

- No enterprise can be fully productive nor truly secure until ALL your data resides in Office 365 where users can access it easily and stakeholders have it under centralized control

Unlock the full power of Microsoft 365's advanced capabilities

"We used Archive Shuttle to migrate 625 TBs of email archives from Veritas Enterprise Vault to Office 365 and will save an estimated \$4.6 million over the next three years as a result."
