

IMPROVING MEETINGS

Meeting 365

Koraal Group provides health care and support to individuals with a physical or mental handicap. They operate from four different locations in the South of The Netherlands providing health care, education services and assistance in finding employment. Koraal has been using Meeting 365 for internal meetings since 2018. Meeting 365 provides structure for their meetings and a central location for documents, tasks and decisions. Meeting 365 is fully integrated into the Office 365 and SharePoint infrastructure.

Improving Productivity

Insight and efficiency

For a productive meeting, it is important that everyone works with the same documents and that there is a central location where all tasks, decisions and documents are stored. Meeting 365 is integrated with Office 365 and SharePoint and provides the integration required to work effectively and efficiently.

Defining Meeting 365

Meeting 365 provides structure for various types of meetings through drafting and sharing the agenda, easily adding documents and archiving all data. This creates a workspace where you can search through your meetings, can easily plan meetings and be up-to-date with your task management.
