

WE HELP ORGANIZATIONS BECOME GDPR COMPLIANT

GDPR2018

The **General Data Protection Regulation (GDPR)** becomes effective on 25 May 2018 and applies to all organizations that gather and process the personal data of European Union citizens. A particular focus of the GDPR is the rights of individuals and the protection of their personal data.

Span's end-to-end GDPR service

Analysis of processes, legal and technical consulting

- identification of operating processes involving personal data
- definition of the legal aspects of data processing
- employee education
- GDPR compliance recommendations

Implementation of security solutions

- data classification
- data encryption
- database supervision and protection

Implementation of Personal Data Protector (PDP) application

- installation and configuration of the PDP application
- education of key users
- integration of PDP with other IT systems
- installation of new versions of the application
- continuous technical and consulting support

What do you need to know about the GDPR?

All organizations that gather personal data of either employees, business partners or clients must ensure that their operations comply with the GDPR.

Alignment with the GDPR is a continuous process of adjusting the way you do business through the revision of operations and IT systems and education of employees on the protection of personal data. The data protection officer becomes a key figure in the organization.

A SMART SOLUTION TO MANAGE PERSONAL DATA PROCESSING

Using a simple and intuitive web application, establish control over personal data and more easily manage their life cycles.

With the application, you can

- create records of personal data processing
- manage consent from data subjects
- manage requests for exercise of the rights stipulated by the GDPR
- monitor incidents tied to infringements of personal data

Personal Data Protector

fully covers the needs of small and medium-size organizations

available in on-premises or cloud versions

enterprise version facilitates integration with other IT systems

English, Croatian and Slovenian interface and multilingual processing

Why Personal Data Protector?

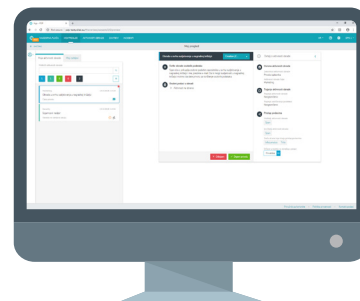

If you employ over **250 employees**, process high quantities or sensitive categories of personal data, you are obliged to **maintain records of personal data processing**.

Data subjects have the **right to withdraw consent** as easily as it was granted.

You must respond to **requests** from data subjects within a **period of 30 days**.

In cases of **breaches** of personal data, you must report the incident to the supervisory authority and the data subjects whose data are threatened within a **period of 72 hours**.

Personal Data Protector is a tool that at all times helps you know **which processing jobs are active, where all personal data are located, the status of consent from data subjects, and requests and incidents**.
