

SaaS Procurement Platform

Simplify and transform Source-to-Contract procurement

Large organisations struggle to control decentralised procurement. Aggregate spend remains siloed and is not optimised. The potential for procurement to support policy goals goes unrealised.

VendorPanel is an integrated procurement platform that consolidates sourcing from prequalified & preferred supplier panels, sector collaborative contracts and local & certified social impact suppliers. Benefits include greater value, improved governance and delivery of measurable social outcomes.

Why customers use VendorPanel

- Better value from procurement spend
- Improved governance and probity
- Data-driven insights and control
- Support for policy outcomes including social procurement and local economic development

Increased value from procurement

- Competitive tension in sourcing
- Collaborative sourcing across groups
- Greater use of preferred suppliers

Improved governance and probity

- Regulatory and policy compliance
- Corporate procurement framework
- Audit trail of sourcing events

Data-driven insights and optimisation

- Category spend management
- Supply chain capability building
- Automated compliance, tender and contract management

9.74% cost avoidance by accessing local suppliers

One-click download of all Tender activity for records management

2.5 hours administration saving per sourcing event

"There was no configuration to do, setup was a clear, step-by-step process and feedback from agencies, departments and suppliers tells us that the user experience is great."

- Victoria Government Technology Procurement Group
