

WinAutoGest

Online management software for driving schools

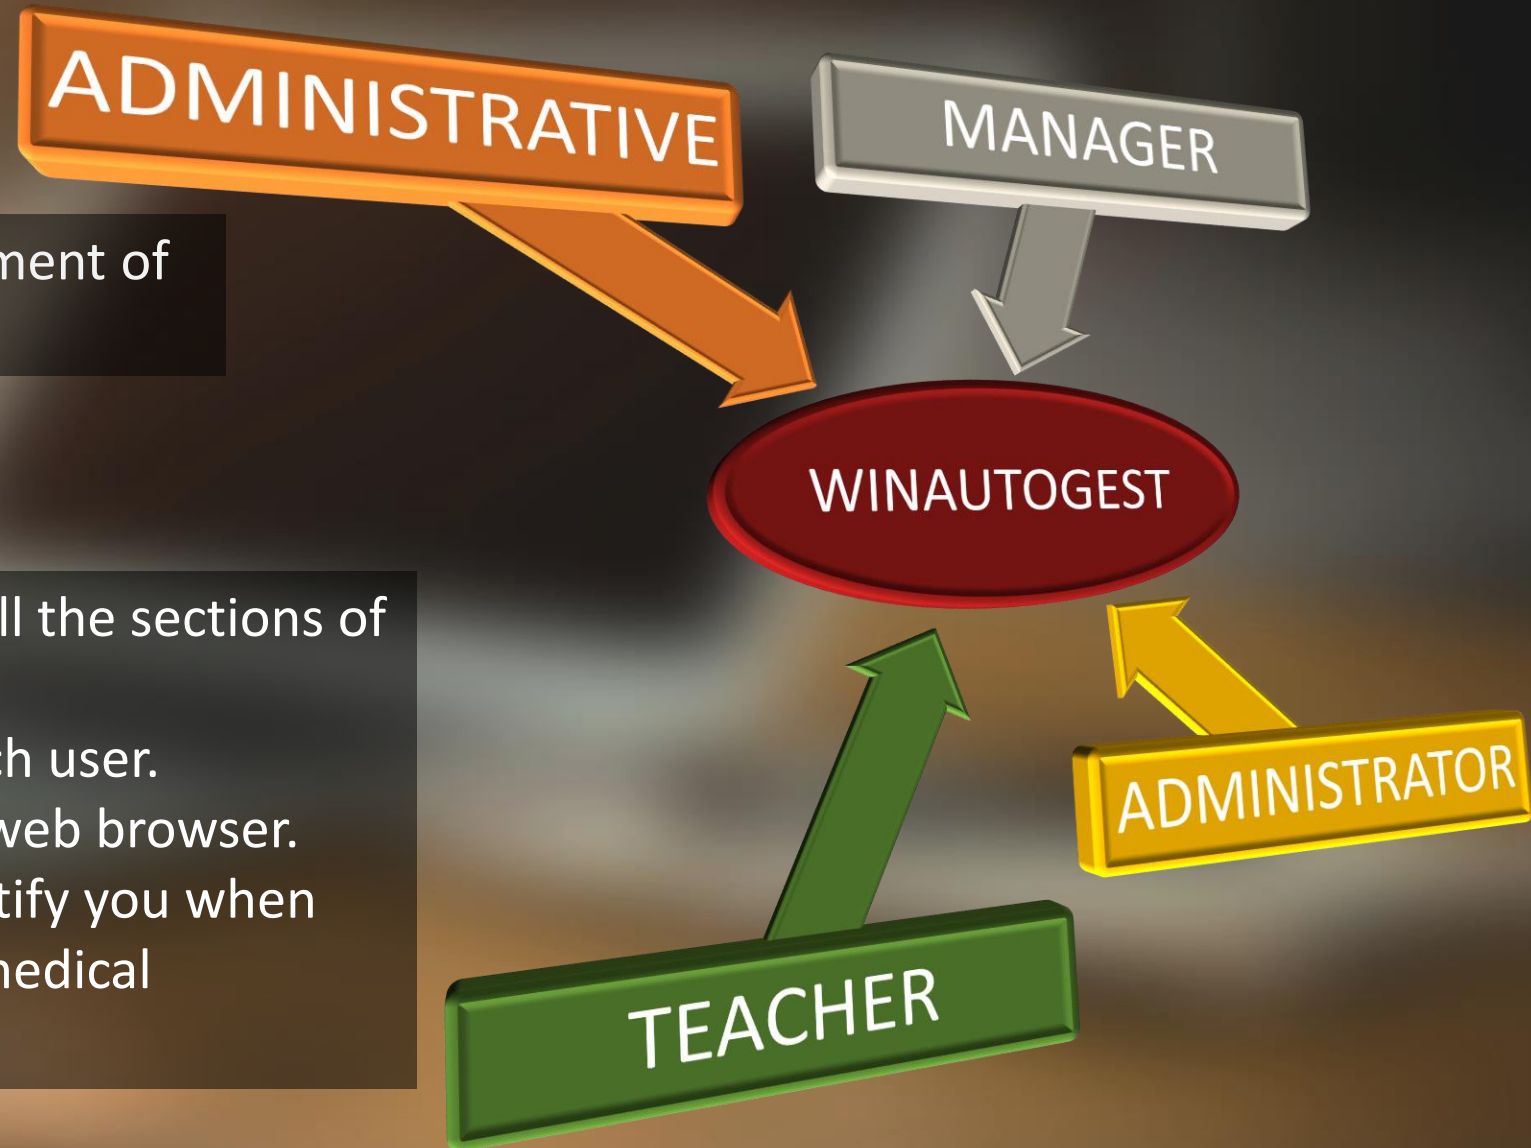

PRESENTATION

Working

Web platform for the complete management of the training center

SOME FUNCTIONS...

1. **Management multisection.** Manage all the sections of your driving school.
2. **Roles.** Manage the permissions of each user.
3. **Access online.** It is accessed through web browser.
4. **Automatic alarms.** The system will notify you when the convocation or file of a student, medical certificate or DNI expires.

Features (I)

Management of students

Manage all the operations related to your students: Enrollment, contract, records, invoices, charges, collections, classes, vouchers or tickets, **assistance to classes**, incidents, summon it to exam, etc.

Expedient

With this driving school program you will automatically control pending calls. When a student runs out of calls, the program will notify you and a renewal will be carried out.

Sections

Configure all the sections of your driving school. It does not matter if you have 1, 2 or 20 sections. You decide what data is visible and editable for each of the users of the sections. View or manage the data of another section, is done with just a click of the mouse.

Schedule teacher

Road training teachers can access their agenda through WinAutoGest or VialProfe, so they can manage the classes to be taught, confirm the student's attendance through their signature, or even see their file to check the vouchers they have used.

Features (II)

Alarms

WinAutoGest will notify you when a student is going to expire a call and / or file with enough time for you to notify your student. In addition, it has other alarms such as: expiration of the DNI, medical certificate, insurance and I.T.V. of your vehicles.

Documents

This driving school software has updated DGT forms, as well as templates for invoices and collections. Among other models, it is worth highlighting: the theory and practical file, the student's file, photo heel, file transfer, presentation to exam, subject to payment of fees

User permission

It controls in detail each permission of the users that manage WinAutoGest. For example, you can set up a user so that you can only register students and record the charges, but you can not modify the configuration of the program or the data of another section.

Accounting

Record all the expenses and purchase invoices of your training center, as well as the sales invoices for the services you have offered. At any time you can review all your billing, to get a detailed summary of the tax base and taxes.

Features (III)

The image displays a web application interface for a teacher calendar, shown on a desktop monitor and two mobile devices. The desktop view features a sidebar with navigation options: ALUMNOS, PERMISOS, PERSONAL, Profesores, Calendario profesores (highlighted), Examinadores, EXÁMENES, VENTAS, GASTOS, CONTABILIDAD, and CONFIGURACIÓN. The main content area is titled "Calendario profesores" and includes a "FILTRAR CLASES" section with filters for "Profesor" (David Martinez), "Tipo de vista" (Lista, Calendario), "Fecha inicial" (11/03/2017), and "Fecha final" (11/03/2017). A "Buscar" button is also present. The calendar shows a grid for "11 marzo 2017" with classes listed for 08:00, 09:00, and 10:00. The mobile view shows a weekly calendar for "domingo, 12/03/2017" with a grid for days D 12/03, L 13/03, M 14/03, M 15/03, and J 16/03. The mobile view also shows a list of "Alumnos" with names, titles, and registration numbers.
