

DONE.PRO

THE MOST RESILIENT PLATFORM
FOR THE ON-DEMAND BUSINESS MODEL

OVERALL IMPACT FROM UBER FOR X BUSINESS MODEL IMPLEMENTATION TO YOUR CLEANING SERVICES BUSINESS

* ACCORDING TO IDC AND GARTNER

Save your money by reducing ~30% of your monthly costs and increasing your ROI up to 200% through business processes optimization and automation (real time tracking, orders scheduling, geolocation based transition, fraud protection, reducing time loss with iteration and calls quantity)

Payment simplicity. Integration with any local payment gateways or even in-chat payments allow to increase your revenue from credit/debit cards.

Win your competitors by attracting more customers with modern iOS/Android client-facing apps that will promote your services and help you to increase quality with rating system including instant feedback from customers aligned with motivation for your staff.

Increase daily orders amount with cutting-edge WEB dashboard (helps your dispatcher or admin get all incoming orders through apps or phone in a real time, track them in browser and route to your cleaners, collect all logs to database, store query information, customers and cleaners profiles etc.,

Pay as you go. No more spending, tens of thousands, hundreds of thousands, or even millions of dollars up front for a software development. Only for license, implementation and training costs. The cost is simple, fixed and relatively small compared to traditional enterprise software.

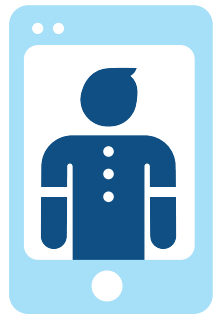

Immediate Time-to-Market: it will take a couple of weeks to develop your on demand readymade executive and customer apps, set up everything you need for effective and smooth working process. We make launching and expanding your on-demand business simple and easy

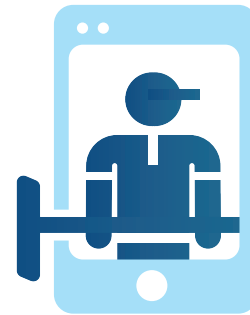

Track your progress and get valuable Insights through reports generation and daily, weekly or monthly analytics

BACKGROUND

The world is witnessing an on-demand delivery frenzy. On-demand firms are disrupting their respective industries, and those to get there first are as much at an advantage over their peers as those who can provide a reliable, customer-focused web or mobile delivered on-demand experience.

We help you conquer both missions with our best-of-breed software suite and unbeatable support. If you seek an alternative to costly, time-consuming in-house app development, and want to break out of or supplement your traditional business model with an on-demand platform, we can be your valuable ally.

DESCRIPTION

DONE.PRO enables Uber for X cloud platforms for businesses in various niches. Our custom development for the web and multiple mobile platforms is executed with understanding, agility and open-mindedness. The result is a resilient app that wins your customers over and reinforces your brand reputation.

As far as operational costs are concerned, you will be happy to know that we outdo the competition at every stage - across order processing, internal process optimization, routing, scoring and reporting. We don't hand-over and leave, rather hand-hold to adjust your business performance and perfect your app.
