

HEALTH AND SAFETY

FOURVISION'S WEB APP FOR MICROSOFT DYNAMICS 365 FOR TALENT

REGISTER INCIDENTS

A healthy and safe workplace is the responsibility of the whole organization. By using the Health and Safety Web App employees are now empowered to register any incident which occur. The incidents are stored in a secure online environment where you can monitor the progress.

MONITOR PROGRESS

Within the Web App you have the possibility to analyse reported incidents. You have also the possibility to create and assign tasks to prevent incidents from happening in the future.

DEVELOPMENT REVIEW TEMPLATE

You can register an incident for yourself, for another employee/ colleague, or a non-employee. The Web App contains a simple step-by-step workflow which guides the employee in an easy way through the process of reporting an incident. The behaviour of the steps and the fields can be easily maintained by an administrator.

The administrator is also able to configure which subjects and fields should be registered like: Incidents, assaults, injuries, treatments, witnesses, Investigations, Declarations and Attachments. An employee can easily upload photos of the incident. Health and Safety is a must in every working environment. Easy to access by your mobile phone.

The screenshot displays the FourVision web app interface for Health and Safety. A 'Registrations' table is visible with columns for FIRST NAME, SURNAME, CONTACT, STATUS, ASSIGNED TO, and ACTION. A dialog box titled 'Create new registration for:' is open, showing options for 'Yourself', 'Other employee', and 'Non-employee'. Below these, a 'Registration type' dropdown menu is expanded, listing options: Assault, Custody adverse, First aid, Incident/ injury, and Near miss.
