

A sensibly simple A+ school system

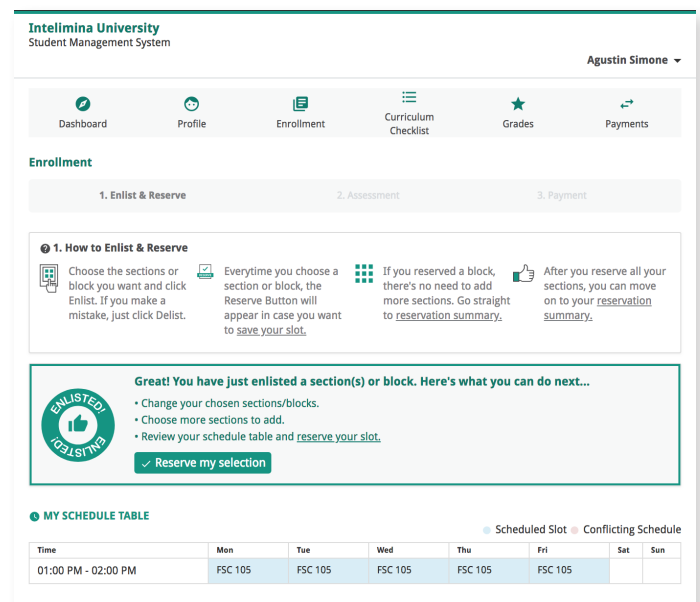

Kick-start your student enlistment with Grado and register a student experience that's excellent.

Find favors, not flaws.

We can't please everybody but we hope to please and win praises from those who matter – administrators managing students, department, and course configurations, students handling and viewing their course eligibility, enrollment, and evaluation; departments tracking real time student engagement for waitlist or unfulfilled classes, rooms, and scheduling resolution; and assessors getting immediate calculation on fees including scholarship status, installments, balances, and other dues and discounts.

Overall, we want every stakeholder's valuable time and resources managed seamlessly into a responsive working system highly rated for quality, flexibility and efficiency.

Build bridges, not cages.

Departments, subjects, instructors, classes, sections, and students are among those with the most webbed relationship in the school ecosystem. Linking them systematically allows wider freedom to access information as needed, when needed.

Long queues no more, just long list of benefits.

Only get involved in planning and then experience school transactions falling rightly and automatically in place. Processing more transactions with less queues and lesser wait time starts after convenient configurations of school requirements and student eligibility.

Break records, not ranks.

Monitor student and subject activities real time for quick coordination and conflict resolution with the appropriate authority as immediately as they arise.

Access. Engage. Simplify.
