

INTERGEN APP FOUNDRY

POWERED BY AZURE & AZURE APP SERVICE

Tailored enterprise-ready web and mobile applications at a fraction of the cost – allowing you to focus on what is important.

WHAT BENEFITS CAN YOU EXPECT?

- Get a best of breed technology stack including a Microservice architecture, modern web frameworks (like REACT and Redux) and the latest Azure services for data storage, APIs and integration
- Shift your investment in unique benefits rather than foundational components
- Optimise your mobile and desktop with responsive design capabilities and progressive enhancement of web based apps
- Get a rich set of component User Interfaces designed for usability and simplicity
- A highly extensible accelerator with developer centric extension points so the solution capability is not compromised when building the customer's solution

Complete, fully responsive web apps can be built in days and customised in minutes.

The InterGen App Foundry provides rapid creation of tailored applications for any business process by:

- Data Management is at the heart of the platform rapidly creating tables, forms and relationships
- Enterprise ready single sign on security out of the box using Azure AD B2C. Invite users to the system via email and SMS with fine grained access control via groups, roles and permissions.
- Supports Facebook, Microsoft Accounts, Google+, LinkedIn, and many others logins
- Easily integrates with Bots – think of a virtual assistant for field workers
- Layouts are modelled in mark-up language making them easy to copy, reuse, tailor and version

KEY FEATURES

Azure SQL Database

Azure SQL Database is a cloud database service enabling your organisation to store relational data in the cloud with the ability to easily scale the size based on business need.

Azure Active Directory B2C

Azure Active Directory B2C is a cloud identity service allowing you to connect to any customer who puts your brand first. Built on Azure Active Directory, the highly-secure cloud identity platform that handles billions of authentications per day, Azure Active Directory B2C offers that same scale, reliability, and availability for your customer-facing applications.

Azure Application Insights

Get actionable insights through application performance management and instant analytics. Azure App Insights detects and diagnoses exceptions and application performance issues. It also monitors Azure websites, including those hosted in containers, plus websites on-premises and with other cloud providers.

Azure App Service

Quickly build, deploy, and scale enterprise-grade web, mobile, and API apps running on any platform. Meet rigorous performance, scalability, security and compliance requirements while using a fully-managed platform to perform infrastructure maintenance.

Azure Power BI

Build beautiful and interactive reports that can connect to a vast number of data sources and can be easily published for your business users to consume on the web and across devices for analysis.

ADDITIONAL SERVICE/PRODUCTS

Data Migration

Consulting and technical assistance in identifying, analysing, planning and delivering your data migration needs across Extract, Transformation, Load and Validation.

Business Value Alignment

Apps can be fun, but it's important however to ensure we are solving a tangible business problem, our Business Value Alignment will help consider the business case.

Change Management

InterChange, our organisational change management service, is designed to work with your business to ensure your investment in applications are optimised by focusing on your people.

Consultancy and Customisation

Extend your solution even further to meet the needs of additional stakeholder requirements.
