# Surveil Hybrid Cloud Cost Management

Complex Azure bills transformed to the way you run your own business

Gain clarity and take control of your Azure bills.

Designed around business consumption to help you maintain your budget, Surveil Azure Cloud Cost Management empowers you to maximise your ROI on your cloud spend.

Why customers use Surveil Hybrid Cloud Cost Management

- Identify business segment spend

- Flexible cost allocation for in-depth analysis

- Automated, up-to daily reports on costs

- Supports Power BI and advanced analytics

- Can link to Surveil Hybrid Cloud Management Platform

Fully leverage cloud elasticity while optimising cloud spend

Surveil Hybrid Cloud Cost Management delivers up-to daily, automated business reports of Azure costs segmented by any business definitions you set up, providing costing information in a format business managers can use.

Know your Business spend

- Visibility on resource use

- Create personalised tags and rules for cost allocation

- Insight on operational costs

Take control

- Eliminate escalating cloud costs

- Schedule automatic resource management

- Receive alerts and recommendations on spend

Peace of Mind

- Surveil monitors your cloud usage

- Fully leverage Cloud elasticity

- Manage your teams' Azure environment

Since implementing Surveil Hybrid Cloud Cost Management, we have a business view of our costs aligned to our systems and realised savings in excess of 25% of our total bill. The ability to review our systems and expenditure whenever we need to has given us unprecedented and invaluable control of our cloud spend.
