MyAdmin provides usefull features for any industry

Makronet

Challenges

- If the customer has multiple locations, they can't seperate costs per location in single tenant.
- They want to set budget limit for each locations.
- Add or remove licenses has long proposal and order processes.
- Can't monitor daily Azure usages, Office 365 licenses and invoices.
- Location admins can't create or edit users if they don't have Office 365 global admin right.
- Customers don't have enough information about their Office 365 security and GDPR roadmap.
- Customer don't enough enough resource and/or knowledge for managing security solutions.

Ideal Solution

Makronet MyAdmin provides following features;

- Seperate costs and invoices per locations in a single tenant
- Define budget limits for locations
- Self-service add or remove licenses
- Monitoring daily Azure usages and Office 365 licenses
- Location admins can create or edit users, assign or unassign licenses, manage distribiton lists without any global admin rights.
- MyAdmin automatize «Secure Score» tests and create GDPR roadmap periodically.
- MyAdmin shows Security Tips for each security features which are monitored.
- Customer can see outcomes and advantages of feature and can apply the feature with auto enable and/or apply buttons.

Desired Outcomes

MyAdmin provides, the regional administrators can use the dashboard to add licenses, manage users, and manage their budget and invoices.

By automating the «Secure Score» assessment into the dashboard, customers can view their secure score as well as what steps can be taken to improve their security posture.

MyAdmin also provides creating GDPR roadmap report with collating the «Secure Score» result and simple questionary.

With MyAdmin customers know the outcomes of the features. If the operation has a simple procedures and outcomes they can be applied easily. Or MyAdmin shows customers how can these features be enabled on tenant and customers.

Makronet MyAdmin + Microsoft 365 Business
