

**Yet Another RIS PACS in the Cloud**

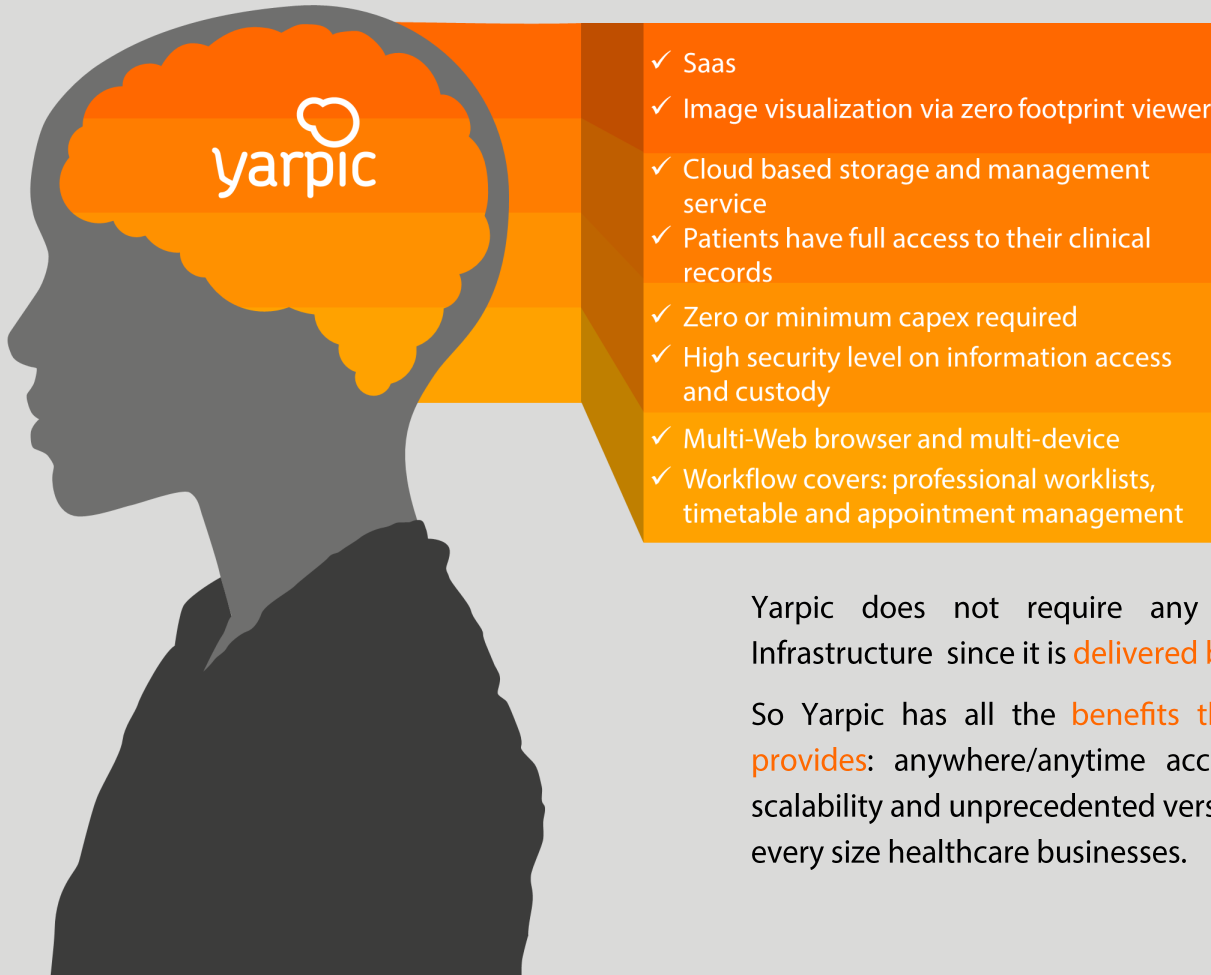

# YARPIC

Yarpic is a **multidisciplinary healthcare software** solution that covers management and patient care processes. Yarpic is a great solution to deal with medical images and it is **fully adapted** to every professional involved in the healthcare business.

Yarpic also **focuses on patients**, bringing them a new way of communication and clinical data management.

- ✓ SaaS
- ✓ Image visualization via zero footprint viewer
- ✓ Cloud based storage and management service
- ✓ Patients have full access to their clinical records
- ✓ Zero or minimum capex required
- ✓ High security level on information access and custody
- ✓ Multi-Web browser and multi-device
- ✓ Workflow covers: professional worklists, timetable and appointment management

Yarpic does not require any On Demand Infrastructure since it is **delivered by SaaS**.

So Yarpic has all the **benefits that the Cloud provides**: anywhere/anytime access, unlimited scalability and unprecedented versatility to cover every size healthcare businesses.

If you are interested in knowing how YARPIC can help you improve your healthcare company, please contact us!

**We will be happy to help you.**
