FLAVORS OF ABUSE

HATE SPEECH

Coming in different flavors, hate speech is more than just ethnic slurs. We know to tag bigotry, even if it's veiled.

PERSONAL ATTACKS

From garden-variety ad hominem to crude cyberbullying, we detect personal attacks even without abusive language.

SEXUAL ADVANCES

Unrequited love may assume ugly forms online. We provide tools to detect sexual advances before they become lawsuits.

CRIMINAL ACTIVITY

Death threats, attempts to procure weapons, explosives, illiciit drugs.

TISANE API: DETECT ABUSIVE CONTENT IN 27 LANGUAGES

Internet is not a nice place; a handful of bad actors spoil the experience for everyone. Online communities have to maintain armies of moderators to ensure civil and safe discourse.

Tisane API is here to provide ammunition to the virtual riot police.

Tisane detects and classifies abusive content, tagging the type and the severity of abuse.
