

# 365ParcelShip

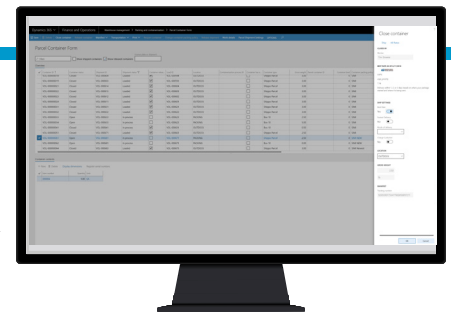

MANAGES SMALL PARCEL SHIPMENTS  
DIRECTLY THROUGH DYNAMICS 365 FOR  
FINANCE AND OPERATIONS

While Dynamics 365 for Finance and Operations manages the data and tasks required for shipping full truckloads or LTL loads, small parcel shipping is not supported. Shippers must work outside the system, using bulky, expensive third-party systems that require expensive integrations.

With **365ParcelShip**, wholesalers and distributors can manage and ship small package orders, using an internet-based rate engine that includes most major parcel shippers, directly through Dynamics 365 for Finance and Operations. **365ParcelShip** manages the record-keeping, label printing and inventory functions required to ship and track small parcels.

## ELIMINATE THE COMPLICATIONS OF SMALL PACKAGE SHIPMENTS

For many wholesalers and distributors, direct-to-customer shipments have become a more important part of the business. But most available package shipping systems are not set up to easily manage small parcel shipments. 365ParcelShip streamlines the process, making it easy to manage small package shipping directly through Dynamics 365 for Finance and Operations.

### 365PARCELSHIP PROVIDES:

- Automated capture of shipping information through Dynamics 365
- Rate shopping through an internet-based engine, with current rates and terms, eliminating the need to track changes and maintain rate tables
- Label printing and shipping information linked to specific orders and customer records
- Support for shipping from multiple locations, like warehouse, inside sales and sales counter
- Predictable costs, with minimal fees of a few cents for each parcel shipped

## PRACTICAL SOLUTIONS FROM THE EXPERTS IN WHOLESALE DISTRIBUTION

---

In business for more than 30 years, Western Computer has a deep understanding of wholesale distributors and the unique challenges they face. Working with scores of Microsoft Dynamics customers, Western Computer has leveraged industry expertise to develop standard commercial products that solve common problems. These distribution applications are verified by Microsoft and are available through Microsoft AppSource.
