

Sundaram Infotech – Your trusted IT Partner from India

Sundaram Infotech is a division of Sundaram Finance Limited. As a Microsoft Gold Certified Partner, Sundaram Infotech has established itself as a premier ERP service provider in the Indian sub-continent. Backed by its core team of functional consultants with rich industry experience, Sundaram Infotech delivers Microsoft Dynamics ERP solutions with certainty.

Strengthen your supply chain with Sundaram's SmartVendor

SmartVendor® is created from the firm belief that the suppliers must earn their place in your business by demonstrating their capability on the two important parameters:

- Delivery
- Quality

Your vendors earn "Delivery rating" based on supply of goods on time as per the confirmed delivery date mentioned in the Purchase Order. Similarly, vendors earn "Quality rating" based on actual volume of goods that got completely accepted (or) conditionally accepted (or) rejected on quality grounds. While these KPIs are in-built, SmartVendor® can be easily configured to have a set of KPIs tailored to your business needs.

Key advantages of SmartVendor

SmartVendor Your supply chain effectiveness can be measured through objective ratings, recorded real-time against every vendor, for their delivery & quality KPIs.
Improve performance. Cut costs.

SmartVendor® helps in the measurement, assessment and management of the existing supply chain. It's an essential component of every supply chain management program and provides the following advantages:

- Drives continuous vendor performance improvement
- Keeps your vendor on track to meeting agreed goals
- Controls budget
- Identifies early signs of elevated risk

SmartVendor® provides a fact-based foundation for improved decision-making, risk mitigation and performance improvement of your supply chain. It empowers you to compare suppliers to identify the ones that perform as per your expectations. If your organization has adapted the Balanced Score Card approach for supply chain management, the metrics from SmartVendor® will surely add strength in helping you determine which vendors are giving you the most for your money.
