## INTRODUCTION

**Personal Data Encryption** is an extension for Dynamics 365 Business Central to securely store and handle sensitive personal data and it also provides additional security to support your company's GDPR compliance.

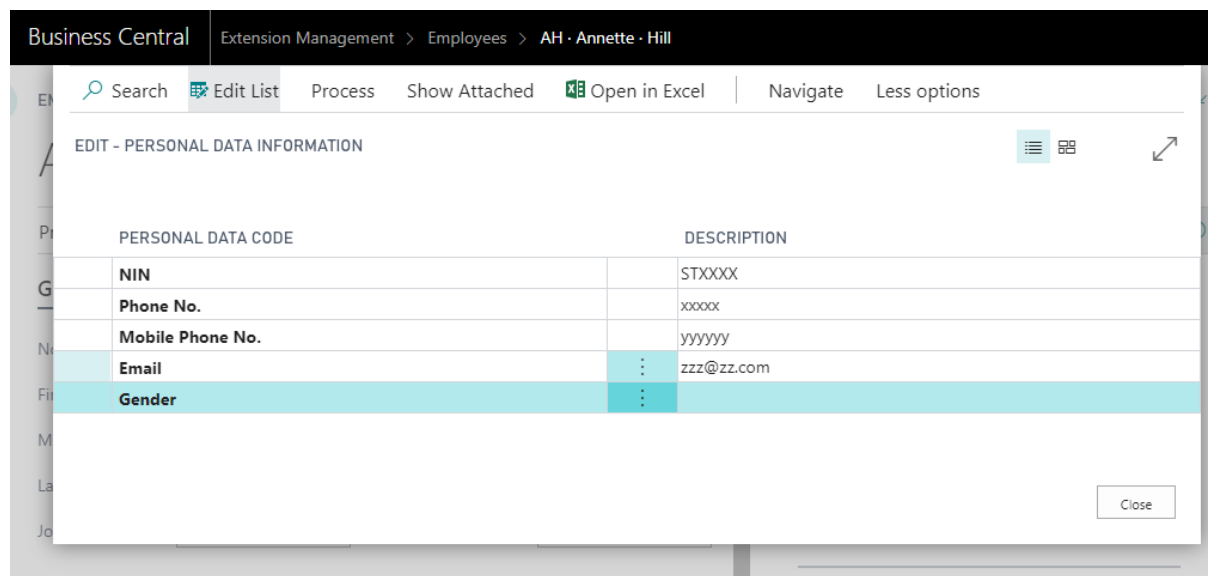

### Feature Highlights

- Extend the standard tables related to individuals, such as Employee, Contact, and Resource
- Access Control: Authorise groups of users to only access specific personal data
- Audit the reading of personal data
- Store sensitive data with Encryption

### Additional Features

- Map extended fields with standard fields, and be able to move data
- Setup types of fields and define specific lookup options
- Define translations for each field description.

*New custom fields can easily be added to employees, contacts and resources*

Business Central | Extension Management > Employees > AH - Annette - Hill

## GETTING STARTED

The first step is to sign up for Microsoft Dynamics 365 Business Central at <https://dynamics.microsoft.com/en-us/business-central/overview/>.

Once your solution is up and running, add the extension from the AppSource marketplace [here](#). For more information on how to do that, see the Business Central documentation [here](#).

### Personal Data

The first time that you try to access Personal Data Information page with the Personal Data button, the following notification is displayed.

✕ Personal Data setup is missing. [Open Setup Wizard](#)

Click on 'Open Setup Wizard' to launch the wizard.

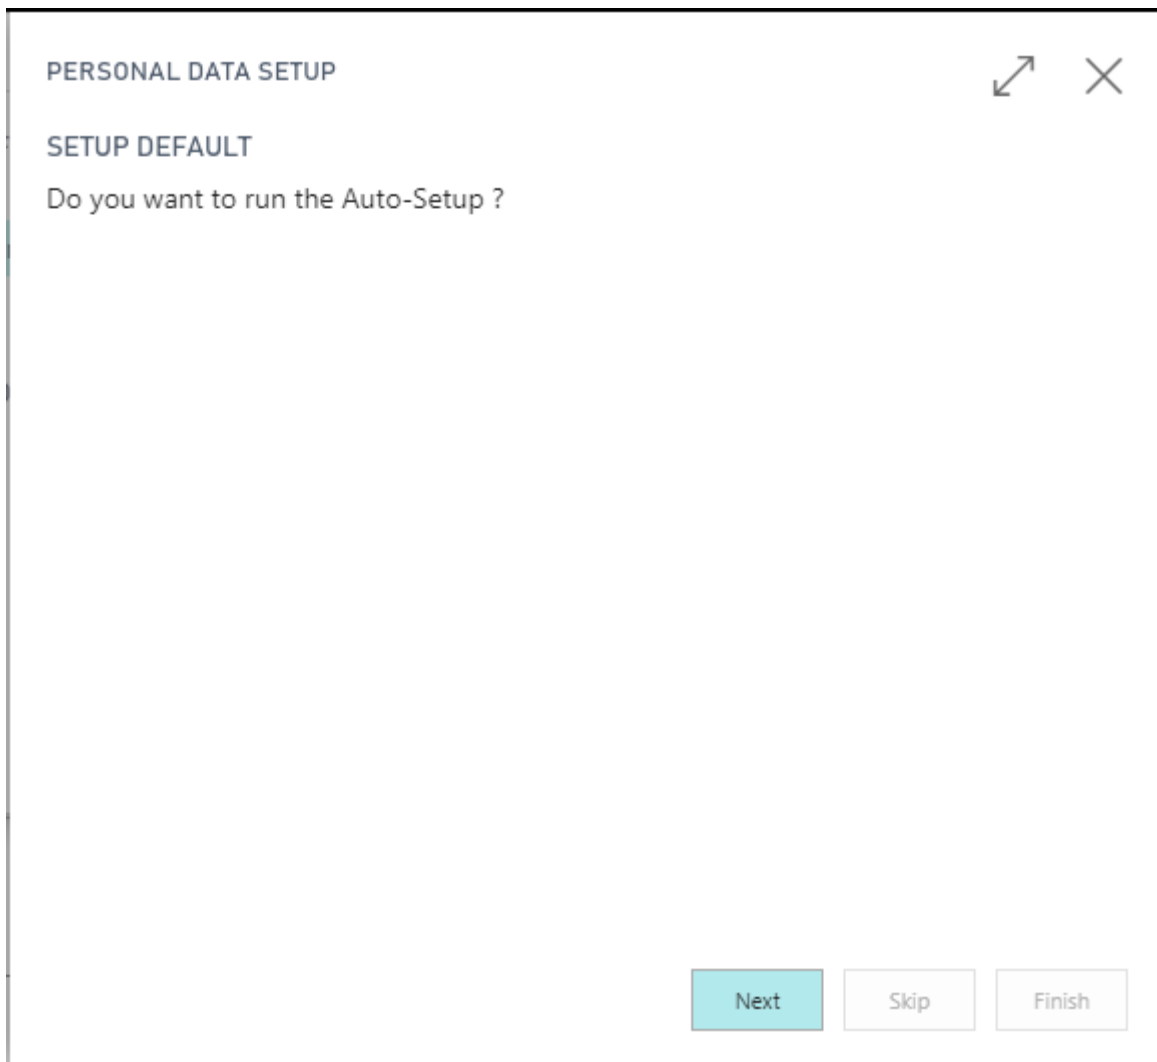

## WIZARD SETUP

---

You can setup the application with three easy steps:

### Step 1 Initialisation

This step will create the roles and basic data on the extensions table.

PERSONAL DATA SETUP

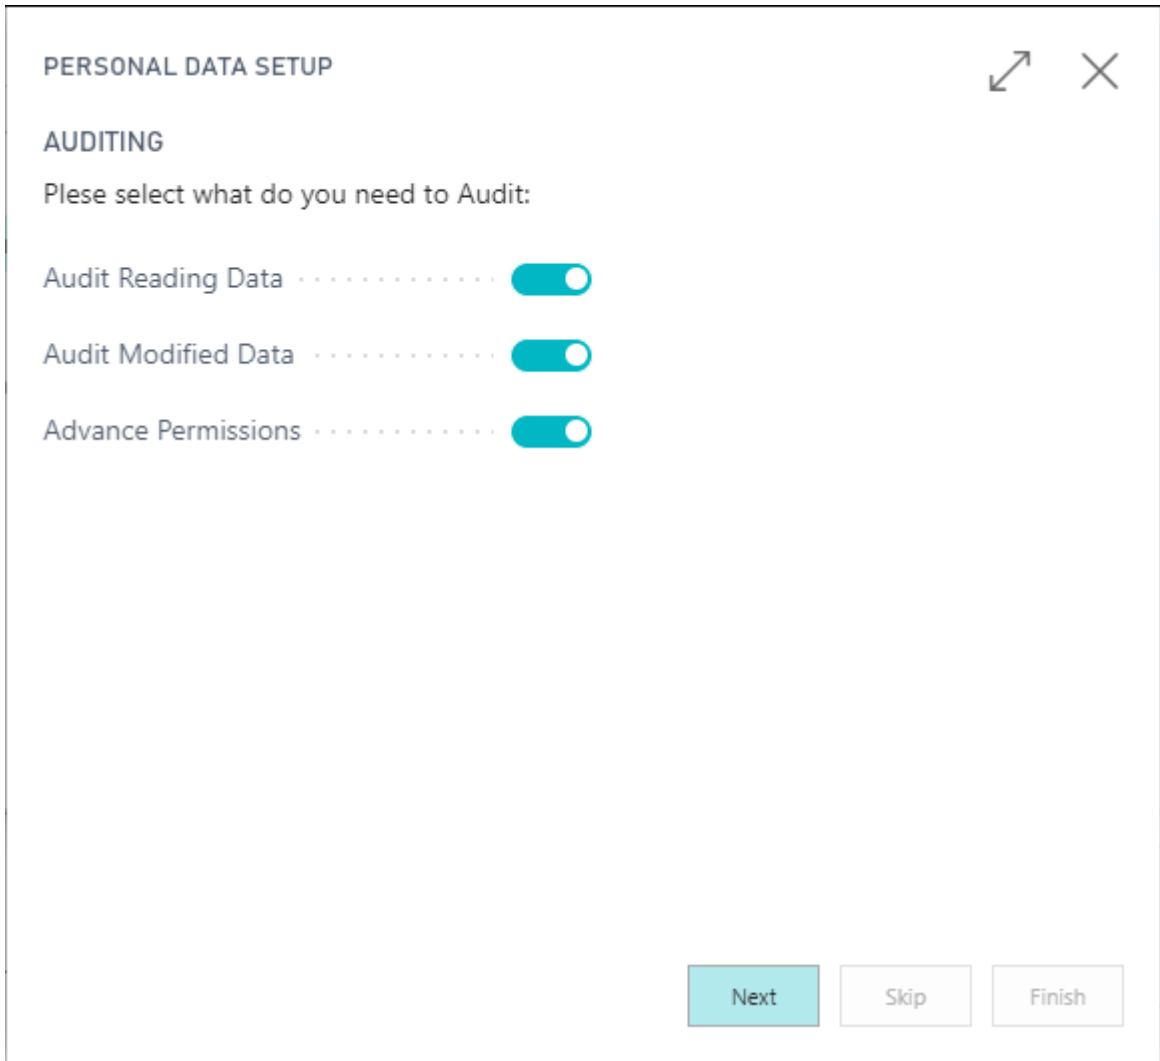

SETUP DEFAULT

Do you want to run the Auto-Setup ?

Next Skip Finish

## Step 2 Select Auditing

This step will activate the auditing for all the activities on your personal data records.

PERSONAL DATA SETUP

AUDITING

Plese select what do you need to Audit:

Audit Reading Data ..... ☒

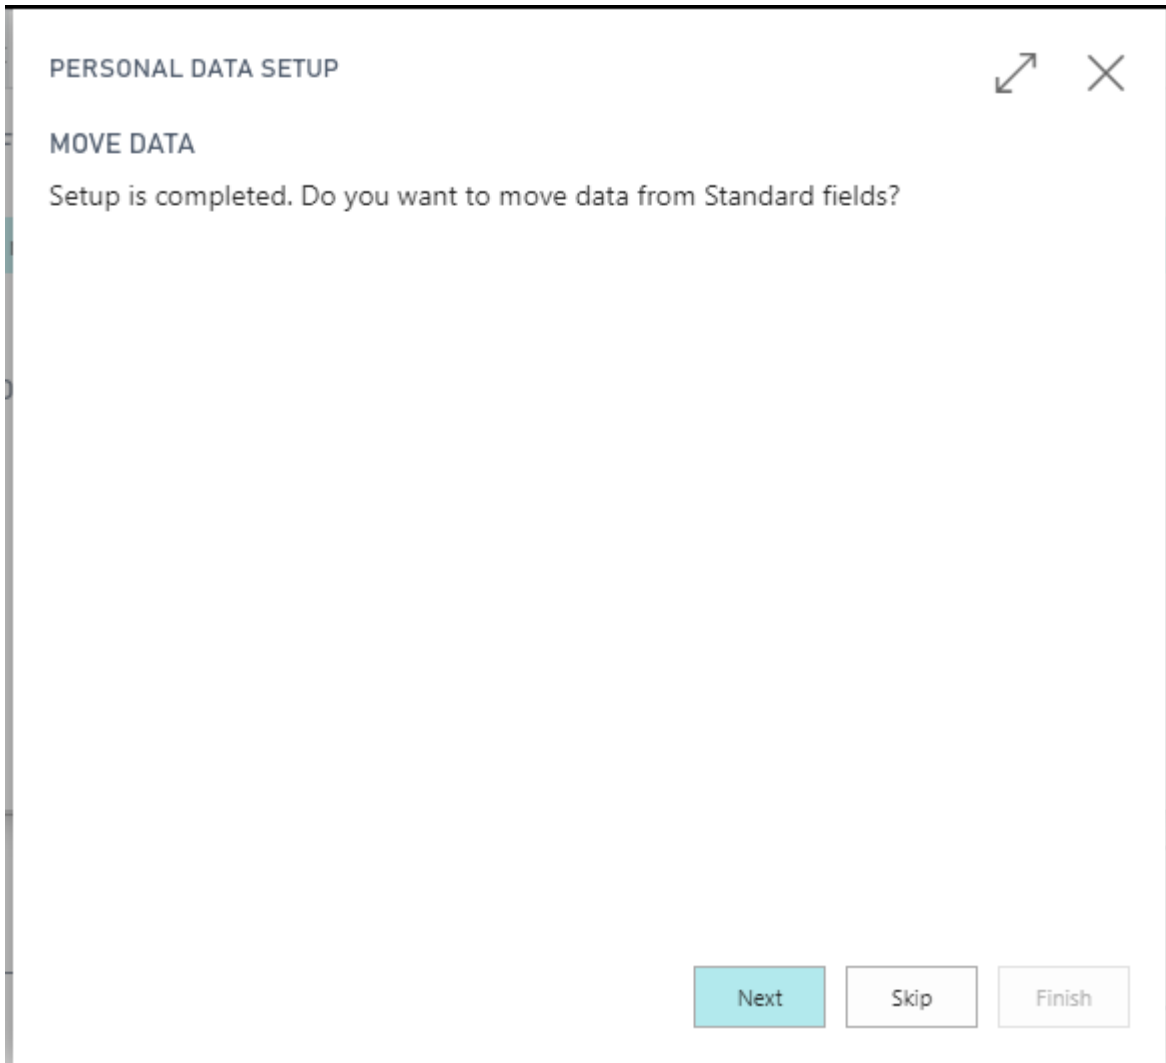

Audit Modified Data ..... ☒

Advance Permissions ..... ☒

Next Skip Finish

### Step 3 Copy Data from standard fields

This step will move data from standard fields such as Social Insurance No. or Email, etc. to the new encrypted entity. You can skip this step if you want to.

PERSONAL DATA SETUP

MOVE DATA

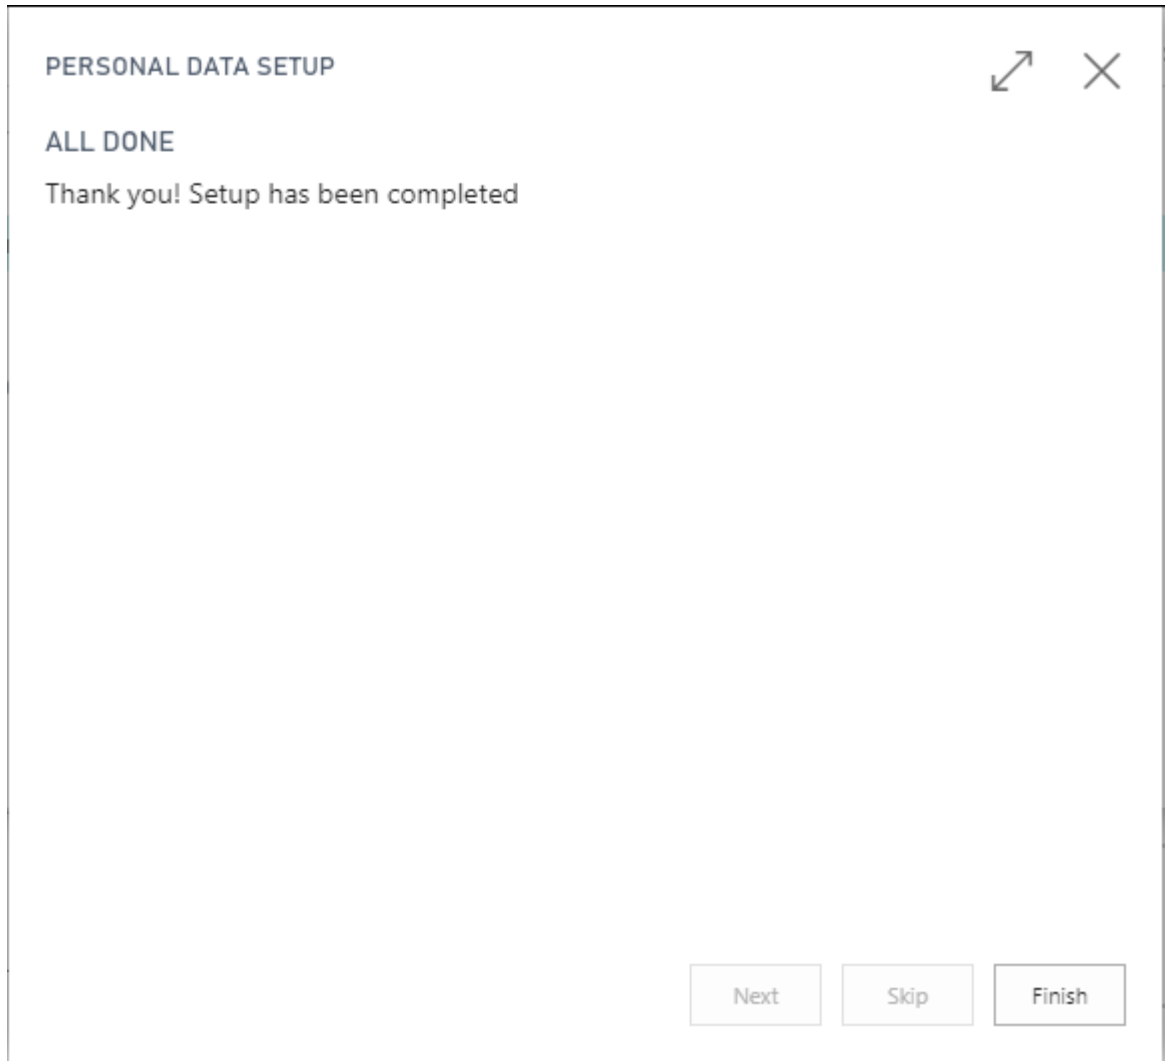

Setup is completed. Do you want to move data from Standard fields?

Next Skip Finish

#### Step 4 All Done

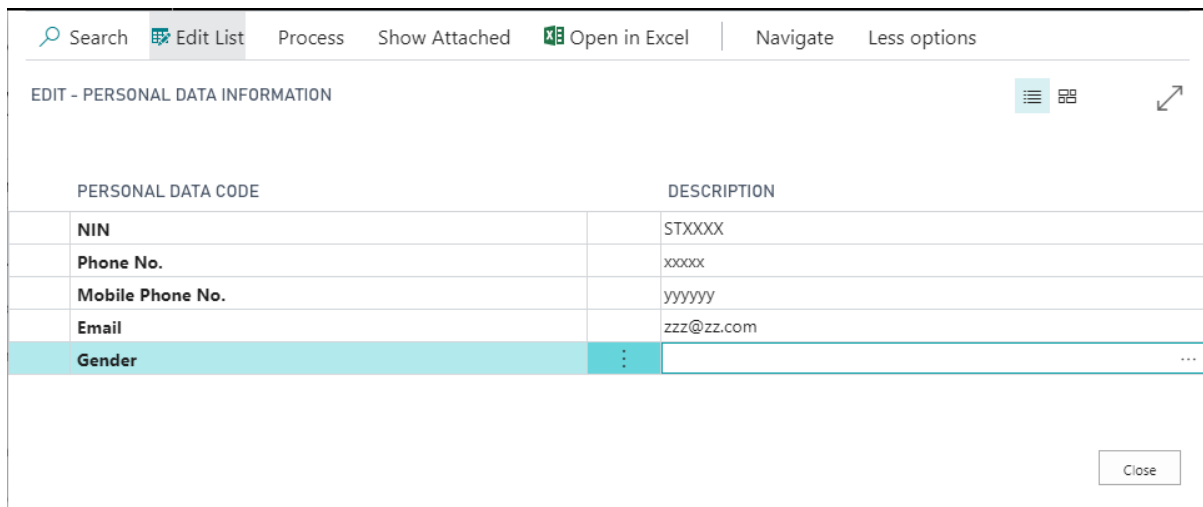

The Setup is complete. You can press the Finish button, and close any opened personal data pages.

## WHERE IS THE EXTENSION IS VISIBLE ON MICROSOFT DYNAMICS 365 BUSINESS CENTRAL

You can open the Personal Data Information page with this button.

PERSONAL DATA CODE	DESCRIPTION
NIN	STXXXX
Phone No.	xxxxx
Mobile Phone No.	yyyyyy
Email	zzz@zz.com
Gender	...

The pages that have been extended with the action “Personal Data” are:

- Employee List
- Employee Card
- Contact List
- Contact Card
- Resource List
- Resource Card

## Employee List

Dynamics 365 Business Central Extension Management > Employees

← EMPLOYEES

Search + New Manage Process Show Attached Open in Excel

Absence Registration Pay Employee Personal Data Ledger Entries

 Annette Secretary

 Roberts John Managing Director

## Employee Card

Dynamics 365 Business Central Extension Management > Employees > AH · Annette · Hill

← EMPLOYEE CARD   

AH · Annette · Hill

## PERSONAL DATA DEFINITION

This is where you can set up which fields you want to secure. You can reach this page with

the  button searching for “Personal Data Definition”.

### PERSONAL DATA DEFINITION

TABLE NO	TABLE NAME	PERSONAL DATA CODE	FIELD TYPE	LOOKUP GROUP CODE	STANDARD FIELD
156	Resource	NIN	Text		
5050	Contact	Private Mobile No.	Text		
5050	Contact	Private Email	Text		
5050	Contact	Gender	LookUp	GENDER	
5200	Employee	NIN	Text		
5200	Employee	Phone No.	Text		
5200	Employee	Mobile Phone No.	Text		
5200	Employee	Email	Text		
5200	Employee	Gender	LookUp	GENDER	

### Mandatory Fields

- Table No. (Use the lookup or capture it directly)
- Personal Data Code (Description of the field to show to the user) \*see translation
- Type
- Lookup Group Code (Only if Type is Lookup).

### Other Fields

- Standard Field (If you need to move data from the standard)
- Sorting No. (Only for visualisation purposes)
- Blocked (Hide the field from the page).

### Page Actions Fields

#### PERSONAL DATA DEFINITION

Search	New	Edit List	Delete	Process	Show Attached	Open in Excel
View Log	Permissions:	Translations	Personal Data Setup	Lookup Group		

## Translations

With this button you can setup translation for a different language rather than showing the Personal Data Code.

## Lookup Group

With this button you can setup other lookup group and options.

## View Log

With this button you can view the audit log for the current field.

## Personal Data Setup

With this button you can open the Personal Data Setup Page where you can check all the settings of this extension.

## Permissions

With this button you can open the Personal Data Setup Page where you can check all the permission settings of this extension.

## PERSONAL DATA SETUP

You can reach this page with the action “Person Data Setup” from the Personal Data Definition page.

### PERSONAL DATA DEFINITION

### Permissions Tab

You can activate the permission roles visualisation and define the superuser role. The superuser role is usually assigned to the person that completed the setup wizard.

## Personal Data Setup

New Show Attached

### Access Control and Permissions

Advance Permissions ☒

Admin Group Permissions: SUPER

### Auditing

Audit Reading Data ☒

Audit Modified Data ☒

Advance Permissions ☒

### View Log Tab

You can activate auditing for any events related to your Personal Data Value.

### Actions

#### Copy Data From Standard Fields

This action will move data from the standard fields to the encrypted fields according to the mapping specified on the definition page.

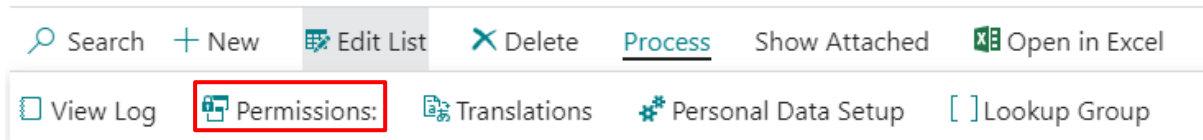

#### Users Group Permission

This action runs the Users Permission page where you can assign roles to users.

## PERSONAL DATA PERMISSION ROLE FOR FIELDS

You can reach this page with the action Permissions on the Page Personal Data Definition, and can select the field that you need to define.

### PERSONAL DATA DEFINITION

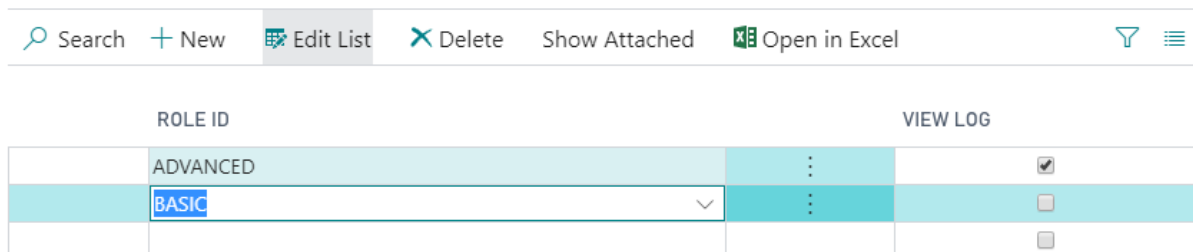

Search + New Edit List Delete Process Show Attached Open in Excel

View Log **Permissions:** Translations Personal Data Setup Lookup Group

You can add new records by selecting the Role ID.

### TVT PERSONAL DATA PERMISSIONS

Search + New Edit List Delete Show Attached Open in Excel

ROLE ID	VIEW LOG
ADVANCED	<input checked="" type="checkbox"/>
BASIC	<input type="checkbox"/>
	<input type="checkbox"/>

You can also specify whether this role has the ability to open the View Log.

### VIEW LOG

☒

☐

These are the auto created roles:

- Basic: Limited Access.
- Advanced: Full Access but not to Setup Personal Data.
- Super: Full Access and Setup Personal Data.

## PERSONAL DATA ASSIGN PERMISSION ROLE TO USER

You can reach this page with the action Users Permission from page Personal Data Setup.

# Personal Data Setup

[New](#)[Show Attached](#)[Users Group Permission](#)[Copy Data From Standard Fields](#)

Then you can add new records selecting Role and User.

PERSONAL DATA ACCESS LIST
