

# CanadaPost for Small Business App

The app that connects Dynamics 365 Business Central with Canada Post for Small Business.

The screenshot shows the Dynamics 365 Business Central interface for editing a CanadaPost Rate Request. The breadcrumb trail is: Sales Orders > S-ORD101001 - Adatum Corporation > CanadaPost Rate Request List > 1. The interface includes a navigation bar with 'HOME', 'ACTIONS', and 'MANAGE' tabs. The 'ACTIONS' menu contains: Delete, Edit, Submit Rate Request, Create Non-Contract Shipment, New CanadaPost Rate Request, Previous, and Next. The main content area is titled 'EDIT - CANADAPOST RATE REQUEST - 1' and shows a form with the following fields:

The CanadaPost for Small Business App provides direct access to CanadaPost services within the Dynamics 365 Business Central application. The app is ideal for small business owners who want to save time and reduce errors. It will allow the user to obtain shipping quotes and generate non-contract shipments for their orders using a few clicks, all within the Dynamics 365 Business Central application.

Features include:

**Rating** - Use the rating services to get shipping costs between two points at various speeds of service and with requested add-on features.

**Non-Contract shipments** - For Solutions for Small Business customers, use non-contract shipping services to create, manage and process shipments—including labelling and inducting parcels for delivery. No manifests are required.

**Tracking** - Tracking services allow you to retrieve information about a parcel's progress through the mail stream and to get details and artifacts related to delivery results.

**Deliver to Post Office** - Deliver to Post Office gives your customer the option to have purchases delivered directly to the Post Office of their choice—such as one near their home, office or cottage.

**Signature** – Retrieve a signature image from a package delivery.

**Refund Request** - Used to request a refund for a shipment/label that you created in error. You can only request a refund for a shipment that has not been sent and has no scan events associated with the label.
