## Docentric AX

The end-user friendly reporting solution for MS Dynamics 365 for Finance and Operations that will optimize your Invoices, Orders, Contracts, Checks and Barcode Labels

Customization of some key reports such as invoices, orders and packing slips proves to be unexpectedly costly and limited in design, performance and print management. Docentric AX not only enables much better use of such business documents in your ERP but also allows end-users to design them by themselves, utilizing the most powerful report designer they already know and love – MS Word.

## By using MS Word as a report designer you will:

- Use all Word's awesome features such as tables, bullets, images, styles and layout options
- Automate not only your invoices and orders but also contracts, HR documents, product data sheets and labels with 1D/2D barcodes.
- Achieve a unified professional look of all your business documents companywide.
- Have a superior support for multilingual reports
- Update report designs in production, right from within your Dynamics 365.

## On top of that, rest assured that with Docentric AX you will gain:

- Ten times faster report customization, significantly reducing your costs.
- Much better report viewer that also works in on-premises environments.
- Greatly improved report distribution: emailing, printing and archiving reports.

Download, install and instantly use enhanced print destinations and modern Docentric's designs for the most common reports.

We are always happy to get your feedback so that we can constantly learn, improve and deliver a better solution to you.
