

EDI in the Cloud for Microsoft Dynamics 365 Business Central

BENEFITS

- Ideal for manufacturers, distributors and other businesses that need to quickly and accurately fulfill and ship B2B and/or B2C orders based on specific requirements.
- A complete, cloud-based EDI solution especially for Dynamics 365 Business Central, developed and supported by one trusted source.
- Robust integration automates the processing of inbound orders and outbound order acknowledgments/sales orders—eliminating manual effort to save time, reduce errors and improve your vendor scorecard.
- Automatically send invoices and posted invoices to complete the order-to-cash cycle. Credit memos and posted credit memos are also supported.
- Critical process controls like unit price verification and duplicate order checking validate transactions to prevent errors and chargebacks from trading partners.
- Makes EDI a strategic investment that enhances competitiveness and pays for itself again and again by saving you time, effort and money.

INTEGRATE EDI AND ERP TO INCREASE AUTOMATION AND EFFICIENCY

For manufacturers, distributors and other supply chain partners using Microsoft Dynamics 365 Business Central, TrueCommerce offers a complete, cloud-based EDI solution that makes it easy and affordable to comply with customer requirements. Our seamless integration with Dynamics 365 Business Central automates time-consuming manual tasks to streamline sales order processing, making EDI a strategic investment that delivers competitive advantage and rapid, ongoing ROI.

With an easy-to-use interface, low total cost of ownership and on-demand scalability to handle growth and seasonal demand spikes, TrueCommerce helps you keep orders flowing—so your business can focus on new opportunities and process more orders without adding staff.

Now you can automate many everyday tasks associated with your EDI sales channel, such as creating sales orders in Dynamics 365 Business Central from incoming purchase orders, and sending invoices and PO acknowledgements to your customers. No more rekeying information! Additionally, achieve stronger communications with your third-party warehouse(s) when you take advantage of integrated transactions such as 940/945. And sending advance ship notices to your customer can be done in a flash! You can even create new customer accounts "on-the-fly" as you process drop-ship, eCommerce or B2B orders using EDI.

Built-in process controls further improve order accuracy and eliminate chargebacks from customers by ensuring that unit pricing, purchase order numbers and items are validated before processing transactions to Dynamics 365 Business Central. TrueCommerce will even alert you to invalid fields before sending transactions.

Like your cloud-based Dynamics 365 Business Central ERP, TrueCommerce gives you all the advantages of a cloud-hosted deployment, including anytime/anywhere access, simplified maintenance and IT cost savings. We also offer best-in-class, hands-on service and support that includes automatic updates to your trading partner maps at no additional charge. Plus, there are no annual contracts and no maintenance fees to worry about.

TRUECOMMERCE FOR MICROSOFT DYNAMICS 365 BUSINESS CENTRAL FEATURES AND BENEFITS

Robust Integration for Greater Efficiency and Customer Satisfaction:

- Seamless, cloud-to-cloud connection between ERP and EDI with no software footprint.
- Automatically send invoices, sales quotes and posted invoices to complete the order-to-cash cycle.
- Send PO acknowledgements from the sales order in Dynamics 365 Business Central to confirm or modify header- or line-level details.
- Also supports credit memos and posted credit memos.
- For drop-ship, marketplace and ecommerce orders, automatically create new customers within Dynamics 365 Business Central when you export the EDI purchase order.

Built-in Process Controls Ensure Data Integrity, Reduce Errors and Minimize Chargebacks:

- Validates fields prior to sending transactions and alerts you to any fields with missing data. No more rejection of inaccurate invoices to slow down payment.
- Supports price classes. Automatic price verification lets you assign the incoming order price, assign the Dynamics 365 Business Central price or alert you if different.
- Other process controls include verification of purchase order numbers and items before processing transactions to Dynamics 365 Business Central.

Robust Integration for Greater Efficiency and Customer Satisfaction

- Advanced sales integration includes sales order and invoice transactions, including inbound purchase orders (850/875), PO acknowledgments (855), advance ship notices (856), and outbound invoices (810/880).
- Outbound ASN integration supports no pack, pick and pack, standard, pallet, and consolidated ASNs.
- TrueCommerce extends shipment packaging contents of Dynamics 365 Business Central to help you meet the needs of compliancy for outbound ASNs.
- Built-in auto pack capabilities give you the ability to package your shipments in Dynamics 365 Business Central, streamlining the process of creating and packaging items.
- Based on who your customer is, create mixed carton and pure carton packaging rules.
- Utilize creation of multiple shipments via shipment automation.
- Auto pack shipments based on quantity or weight.

Streamline Your Third-Party Warehouse Communications

- Outbound warehouse shipping orders (940) can automatically be created from existing shipments from within Dynamics 365 Business Central.
- Integrated warehouse shipping advices (945) will update existing shipments with package and item contents in addition to shipping information (e.g., tracking, ship weight, quantity); lot and serial numbers are supported, as well as consolidated shipments.
- Outbound advance ship notices (ASN) can easily be sent to your customer, based on the information from the 945.
