

# Dynamics 365 Business Central - Advanced Banking

## Advanced Banking – All-in-One Solution for your Financial management

- From Payments, Banking, Value-Added Tax to Balance Sheets – with Advanced Banking, we have developed a powerful all-in-one Finance Management solution which combines our expertise and know-how of vertical experience. By using Advanced Banking, you can control and manage your financial flows in an easy and convenient way.
- Our certified standard software supports Microsoft's ERP solution Dynamics 365 Business Central and offers a comfortable all-in-one solution. Being comprised of different modules, Advanced Banking ensures smooth and efficient financial accounting workflows.

## Advanced Banking – Combining Key Finance Management modules

- Based on our long-term industry experiences, we know the complex processes and increasing data streams which need to be processed in the Finance departments of companies.
- To simplify the management of your customers, vendors, banks and tax authorities, we have developed the special software Advanced Banking which is comprised of different modules.
- Each of these modules covers a specific Financial Management area and enables you in combination with Microsoft's business software Dynamics 365 Business Central to benefit from user-friendly and accelerated workflows.
- In addition to the smart use of open entries, which gave its name to the software, Advanced Banking also offers elegant solutions for the Payments, Associations, Trial Balance and VAT, G/L Open Entries, Extended Lists and Reports, Installments, Assets Accounting and the module Multiple Payment Discounts.
