Dynamic Data Exchange
makes it simple to set up integrations

The Dynamic Data Exchange app is a powerful yet simple way to set up integrations and data imports – without having to spend a lot of money on developing custom import functionality.

Companies often spend many hours developing import functionality for data connections, but that is no longer needed with this app.

With Dynamic Data Exchange, a new integration can be set up entirely using data settings. You may do it yourself or get a consultant to do it. Either way, it's quite simple.

No more costly development of your simple integrations.

Import Fields | Manage

DISPLAY ORDER	COLUMN IN EXCEL	TABLE ALIAS	FIELD NO.	FIELD NAME	FIELD DATA TYPE	FIELD DATA LENGTH	PATH	INCOMI... DOCUMEN TYPE	CR... ADDI VALU	RE... SIGN	RE...	SKIP VALU	SKIP EMPT VALU	IS FILTE
60	_	SH	2	Sell-to Customer...	Code	20			☐	☐	☐	☐	☐	☐
70	_	SL	6	No.	Code	20			☐	☐	☑	☐	☐	☐
80	_	SL	15	Quantity	Decimal	12			☐	☐	☑	☐	☐	☐
90	_	SL	22	Unit Price	Decimal	12			☐	☐	☑	☐	☐	☐

Benefits

- Set up integrations on your own
- Many features – Simple interface
- No need for consulting services
- No programming – All is done with data settings

Main features

- Automated, scheduled integrations
- No limit to number of integrations or amount of data
- Multiple data types, like FTP, Webservice, SOAP etc.
- Simple mapping of tables and fields
- Merge, crop, calculate, translate, format etc.
- Map external account numbers to your chart of accounts

Import
