

# ROASTING 365

The Complete Business Management Solution Cloud for Coffee Roasters

ROASTING 365 is our complete package for Microsoft Dynamics 365 Business Central. We offer a range of specialized apps and services designed to support the operational end of coffee roasting businesses.

*Roasting 365 facilitates your work flow so that you can concentrate on what's important; roasting the perfect coffee!*

Manage your roasting on our dashboard and keep your finances under control. Roasting 365 provides automatic customs clearance reports, roast planning and roast production of batches including roasting profiles.

Evaluate past roast profiles and optimize your production. Determine your purchasing needs in advance and support planned production or organize roasting for stock or for external customer orders.

ROASTING 365 is modular, allowing you the flexibility to start quickly with the most important functions such as writing bills, saving roasting profiles or ordering green coffee and managing your warehouse.

As your business grows and your processes become more diverse, Roasting 365 adapts to your needs. You can add additional modules as needed to react dynamically to your growing business.

*Interested in customization?  
We're here to advise you and  
as also develop individual  
solutions.*

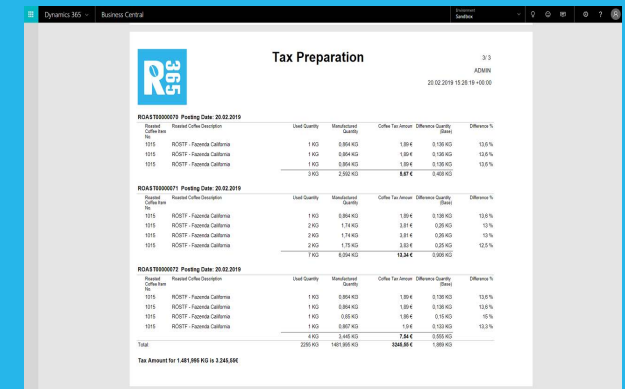

*Want to get rid of scattered systems?*

For many years our customers gathered experience, needs and new requirements for their operational businesses. Typically your IT landscape also grows, but in a scattered way.

*If you are a coffee roaster and want to concentrate on your daily business, than we can help you!*

Roasting 365 combines all your systems to one integrated solution in the cloud.
