

SOLUTION SPOTLIGHT: AssureSign SMS

Explanation

The AssureSign SMS solution utilizes short messaging service (SMS) technology to mobilize the end user's signing process. After enabling your account for SMS use, AssureSign customers can send a text message to signers with a link to view and sign any document. Signers can complete the signing process from start to finish on any internet-enabled device at no additional cost to the signer*.

Facts

- Available on all AssureSign platforms, including the web portal and CRM integrations
- Available for pre-created templates and one-off documents
- Supports multiple signers
- Provides tracking analytics and document completion notifications via the web portal
- Signing process supported on tablets, smartphones, and other internet-enabled devices
- Includes international SMS capabilities

Additional Tools/Cost

The AssureSign SMS solution is available to any validated AssureSign user for a nominal fee. The SMS function is populated within the AssureSign eSignature workflow--no additional setup required.

Steps to Success

1. Setup

2. Send

3. Sign

*Carrier text messaging rates and fees may apply
