# ASTRO GEOGRAPHY VALIDATION

VERSION 2.0

APRIL 12, 2017

## Astro Geography Validation

Astro Geography Validation plug-in helps validating geography related information in Dynamics CRM.

---

### Overview

Astro is one of the world's biggest repositories of reference data content. Astro Geography Validation plug-in helps consumers validate their geography related information in Microsoft Dynamics CRM. This ensures high quality data flowing into their LOB applications.

Astro Geography Validation plug-in validates the Postal Code of a given address against the Country and/or State name provided. The plug-in provides additional help by auto-populating the Country and State fields. This plug-in currently supports geography validation for both Accounts and Sales modules.
