

Cloud based monitoring and smart alarming to efficiently manage your day to day operations

EcoStruxure Asset Advisor Preventive services for electrical distribution

Move to proactive digitally-enabled asset management

Problems with electrical distribution equipment are usually discovered too late when a major breakdown happens resulting in operational losses and expensive, time-consuming, urgent maintenance.

This reactive approach to asset management exposes you and your employees to critical risks and to everyday uncertainty.

Whether it is to improve the protection of your personnel, production line availability, or extend equipment lifetime, watching your system and managing it wisely is key.

With EcoStruxure Asset Advisor preventive, you establish a proactive approach to your electrical distribution system management.

This innovative cloud-based service helps you to manage electrical distribution assets efficiently and to prevent major interruptions before they occur.

With live data on your critical assets you will have 24/7 visibility into your site performance and energy consumption.

With this rich digital functionality you are empowered to monitor, identify and address potential issues at early stages.

Benefits

Manage risk

- With 24/7 remote asset health visibility

Secure operational excellence

- By reducing downtime risk and by optimizing your assets lifetime

Increase employees protection

- By detecting early abnormal conditions

Achieve financial efficiency

- With better control of energy bills, maintenance and operations budgets

EcoStruxure Asset Advisor
