

Microsoft Dynamics 365 for Operations does an outstanding job meeting the needs of the average manufacturing company.

However, some manufacturers have greater needs that aren't covered in an out of the box implementation.

The Solution

Ellipse Production was built to better supplement the needs of manufacturers looking for extended functionality in the Production Control and Master Planning Modules in Microsoft Dynamics 365 for Operations.

Key Features

- Production Scheduling Enhancements
- Shift Tracking and Analysis
- Site Designation for Production Journals
- Production Report as Finished Discrepancies
- Automatic BOM Consumption on Report as Finished Journals Based on Flushing Principle
- Non-Conformance Reporting Production Extensions by Project, Shift, Operator, etc.
- Cost Analysis Summary by Production Order
- Route Card Document Date Tracking
- Mobile Applications
