AXtension®
Shipping Connect
Integrate all your logistics service providers into one uniform process

Challenges

Every shipping carrier has its own interface for booking shipments. That means that when you want to integrate with these interfaces, for every carrier, you will have to go through a time-consuming process in order to get all the information directly in the ERP system.

Enhance your Microsoft Dynamics 365

AXtension® Shipping Connect enables you to deliver higher quality to your customers because all the information about your transport is right at your fingertips.

Save time

Make substantial time savings by using one uniform, integrated process. No wasting time developing or changing interfaces, because that has been taken care of. With over 300 transporter links, starting is just a matter of days instead of months.

Save money

Save up to 20% on your transport costs by having insight into the most favorable delivery terms for each unique shipment.

Only the best

Gain a clear insight into costs and delivery terms at an early stage, allowing you to communicate proactively with customers about the shipment status. And, very importantly, prevent input errors and incorrect shipments. This allows you to turn that last mile into a new sales opportunity.

Fun to work with

No need to change between providers. Organize your shipments easily in one dashboard, with just a simple click on the button. It does not get any simpler than that, even turning on your dishwasher requires more effort.

How can you benefit

See how you can integrate all logistics service providers into a single, uniform process starting in Microsoft Dynamics 365 with AXtension® Shipping Connect.

- **300+ transporter links available** | Make substantial time savings by using one uniform, integrated process.
- **Print labels** | Print a transport label directly from Microsoft Dynamics 365.

- **Carrier selection** | Save up to 20% on your transport costs by having insight into the most favorable delivery terms for each unique shipment.
- **NEW: Purchase order pick up & returns** | Optimized purchase related logistic processes. This allows you to choose the delivery or pick-up method that really suits best for your organization.

- **Use master data** | AXtension® Shipping Connect is fully integrated in Dynamics 365 and retrieves information directly from your ERP system.
- **Dashboard overview** | Easily follow the status of shipments (Track & Trace), cancel/change shipments and (re)print labels or documents.
- **NEW: Transfer orders** | Arrange the transport for transfer orders. Eliminate the need of using multiple systems for creating shipment bookings with your carriers and significantly improve your internal logistic processes when handling transfer orders.
- **NEW: RMA order support** | AXtension® Shipping Connect can now be used for return orders. Optimize your customer experience by handling the pick-up of RMA orders in Microsoft Dynamics 365.

- **One dashboard** | One unified method to creat shipments, regardless of shipping provider.
- **NEW: Drop shipments** | AXtension® Shipping Connect now supports the logistic handling of drop shipments.

About AXtension

With over 380 customers, 800 global implementations and 100,000 users, companies world-wide have successfully enhanced their Microsoft Dynamics platform. AXtension® solutions are easy to implement, simple to use and 100% extensible.
