

CONTRACTS.AI

Contracts.AI  - Applying intelligence to business documents in your enterprise extracting key business insights from CRM - Sales, Legal, Finance documents.

Integrates with powerful machine learning software that identifies, extracts, and analyzes text in your contracts and other documents.

The screenshot shows the 'Welcome to Contract.AI Wizard tool' interface. It features three tabs: 'Document Wizard', 'Analyze Wizard', and 'Entity Mapping'. The 'Document Wizard' tab is active, showing a 'Document/Project Category' dropdown set to 'Cloudely Demo'. Below this is a table for 'Contracts for Analysis' with columns for 'File Name', 'Subject', and 'File Type'. A single file is listed with a checked checkbox. A 'Submit AI-Analysis' button is at the bottom right. The 'Analyzed Contracts' section shows a table with columns for 'Doc Category', 'File Name', 'Job Id', 'Job Status', and 'Doc Id'. The file is shown as 'Processing...' with a red button. A 'Retry' button is at the bottom right.

File Name	Subject	File Type
<input checked="" type="checkbox"/> Test - NDA - 00000128_0_Final_Mutual NDA_2018-12-05 5.pdf	Test	application/pdf

Fig 2: Document Wizard- Analysis completed.

- ✓ AI engine extract, transform and analyze your documents with predefined rules and gradually enrich its analysis capabilities by applying machine learning to deep learning. Which drives the AI engine to increase its accuracy for extracting the result. In Contracts.AI “**Analyze Wizard**” comprises the extracted results from AI engine for further verification and judgement.

Fig 3: Analyze Wizard

- ✓ Contracts.AI wizard is built on top of Dynamics 365 platform and third-party AI engine are processing the documents to extract the expected analyze outcomes. As Contracts.AI app is collaborating between D365 and AI engine platforms, third step “**Entity Mapping**” is act as a bridge to fill the gap between to system. For the initial release we are considering static mapping. Near future we will provide the dynamic field mapping to make this app more scalable and robust.
