## Prerequisites

Install RESCO Mobile CRM Woodford in PC using following link

- Use Internet Explorer to download Woodford because it need Silverlight installed in the computer

<https://resco.net/mobilecrm/woodfordhistory.html>

- Click on Version 10.0.3.0
- Download standalone installation and it will install desktop client of RESCO Woodford

**Resco MobileCRM Woodford v10.0.3.0**

Microsoft Dynamics CRM 2011, 2013 & 2015 Integration

Download for 2011

Download for 2013, 2015 & 2016

**Standalone application**

Install

To integrate the MobileCRM Woodford application to the Microsoft Dynamics CRM environment, please download the s...

Please press the install button to install the MobileCRM Woodford application to your desktop computer.

**Required minimal Mobile CRM version 10.0+**

**Please before installing the new version of the Woodford make a backup of your current mobile project with the installed version.**

Woodford Version History

- Please verify the installed version of the Woodford solution in CRM is compatible with standalone application.
  - If Woodford standalone application is in version 10+ then Woodford solution in CRM should have the same 10+ version (not 9+ solution).

### Microsoft Dynamics CRM 2011, 2013 & 2015 Integration

[Download for 2011](#)

[Download for 2013, 2015 & 2016](#)

To integrate the MobileCRM Woodford application to the Microsoft Dynamics CRM environment, please download the s

### Standalone application

[Install](#)

Please press the install button to install the MobileCRM Woodford application to your desktop computer.

**Required minimal Mobile CRM version 10.0+**

**Please before installing the new version of the Woodford make a backup of your current mobile project with the installed version.**

Woodford Version History

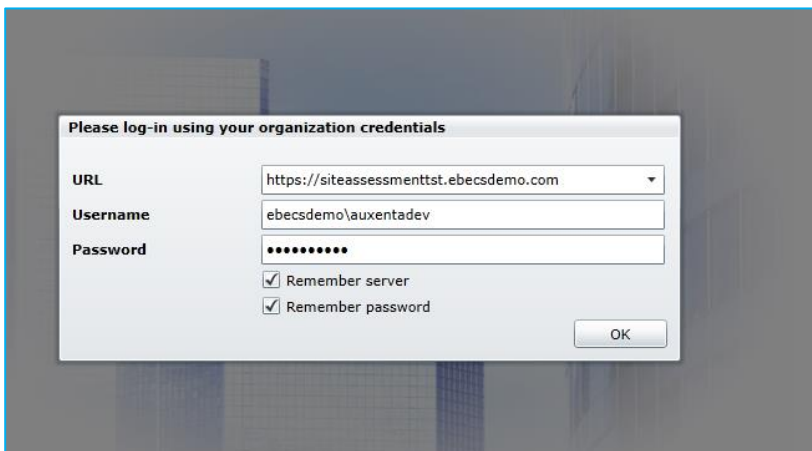

- Import latest solution of Site Assessment Survey in to target environment

# 1 Getting Start with Configuring RESCO Mobile CRM Project

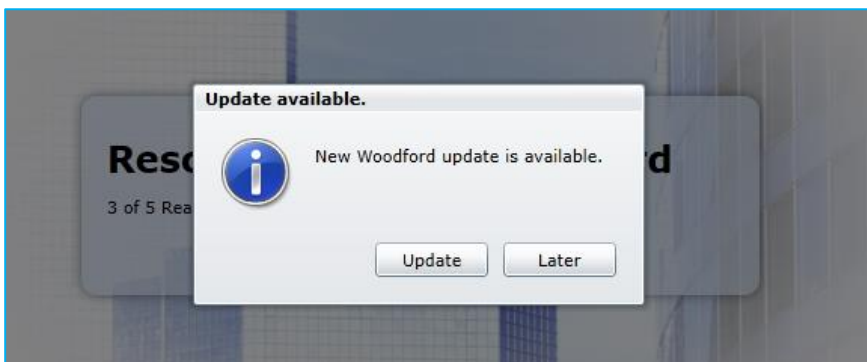

## 1.1.1 Connectt to Dynamic 365 Solution

Open installed Woodford desktop client

Enter CRM environment details to connection wizard

If Woodford solution proposed update solution you can skip it

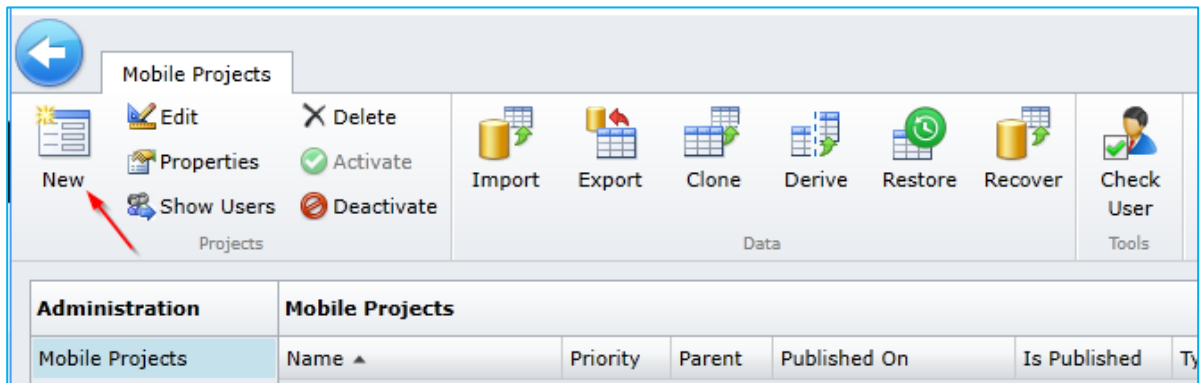

### 1.1.2 Create New Mobile Solution

If there were no existing mobile project then create new mobile project.

Refer Woodford Guide for more details: [https://www.resco.net/downloads/Woodford\\_Guide.pdf](https://www.resco.net/downloads/Woodford_Guide.pdf)

Click on New button to create new solution

Add the name for project and select relevant security roles

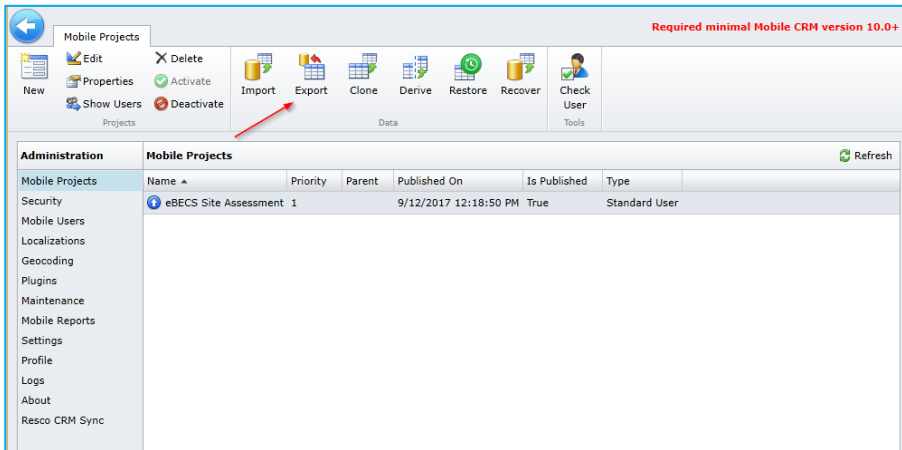

The 'Add Mobile Project' dialog box is shown. It has the following fields and options:

- Type:** Standard User (dropdown)
- Template:** Default (dropdown)
- Name:** eBECS Site Assessment Survey (text input)
- Priority:** 0 (text input, with a note: 'Any number; projects with higher priority are preferred')
- Roles:** (CRM roles that can use this project)
  - ☐ CEO-Business Manager (SITE ASSESSMENT DEV)
  - ☐ CSR Manager (SITE ASSESSMENT DEV)
  - ☐ Customer Service Representative (SITE ASSESSMENT DEV)
  - ☐ Delegate (SITE ASSESSMENT DEV)
  - ☒ eBECS Survey Administrator (SITE ASSESSMENT DEV)
  - ☒ eBECS Survey Surveyor (SITE ASSESSMENT DEV)
  - ☐ Knowledge Manager (SITE ASSESSMENT DEV)
  - ☐ Marketing Manager (SITE ASSESSMENT DEV)
  - ☐ Marketing Professional (SITE ASSESSMENT DEV)
  - ☐ Sales Manager (SITE ASSESSMENT DEV)
  - ☐ Salesperson (SITE ASSESSMENT DEV)
  - ☐ Schedule Manager (SITE ASSESSMENT DEV)
  - ☐ Scheduler (SITE ASSESSMENT DEV)
  - ☒ System Administrator (SITE ASSESSMENT DEV)
  - ☐ System Customizer (SITE ASSESSMENT DEV)
  - ☐ Vice President of Marketing (SITE ASSESSMENT DEV)

At the bottom, there are 'OK' and 'Cancel' buttons.

### 1.1.3 Backup Existing Project

It should be mandatory action to backup existing solution before applying new changes. Using export button user can export the existing project easily.

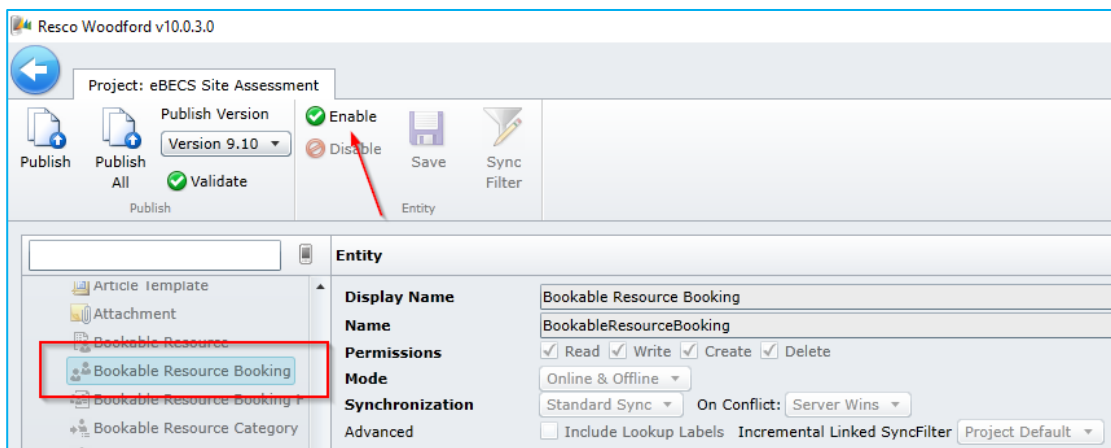

## 2 Perform Entity Customizations

Before proceeding with customizations need to enable survey related entities in mobile project.

### 2.1.1 Enable Entities

To enable entities, select the relevant entity and click on enable button then entity will be added to the solution.

### 2.1.2 Enable Entity Field

After enable entity need to add necessary fields of that entity to solution. After selecting relevant fields click on Save icon and it will save changes.

#### Warning:

Selecting fields and click on save button while system in saving mode, sometime will not save new changes.

#### 2.1.4 Validate Customizations

After performing the customization user can validate performed customizations using inbuilt validate function.

If all customizations are valid then it will show no error found message.

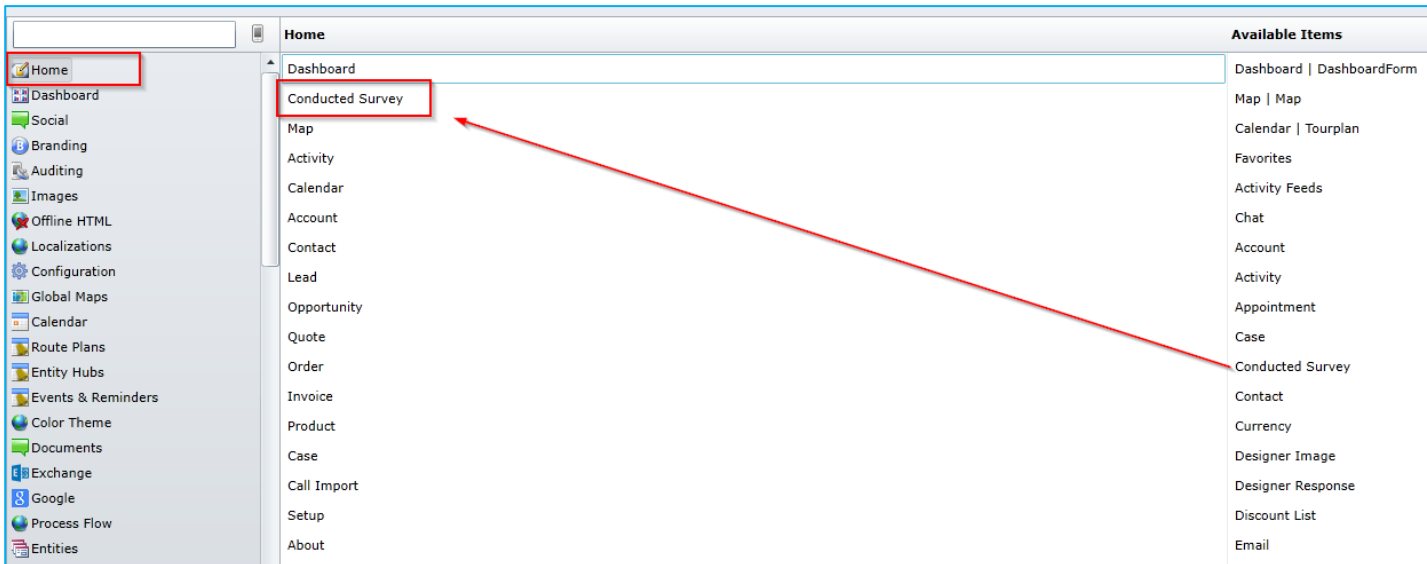

#### 2.1.5 Publish Customizations

After validating customizations then need to publish them.

### 2.1.6 Home Menu Customization

To show conducted survey in the RESCO Mobile CRM menu, need to add conducted survey entity to home. In the Home it shows all available entities and only thing need to do is drag and drop Conducted Survey item to correct place in the Home menu.

### 2.1.7 Adding Views

To view existing conducted surveys, need to create filtered views for the conducted survey entity

Following 3 views need to be created

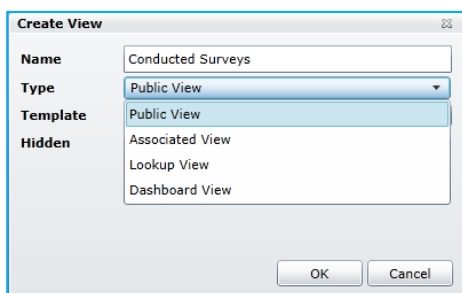

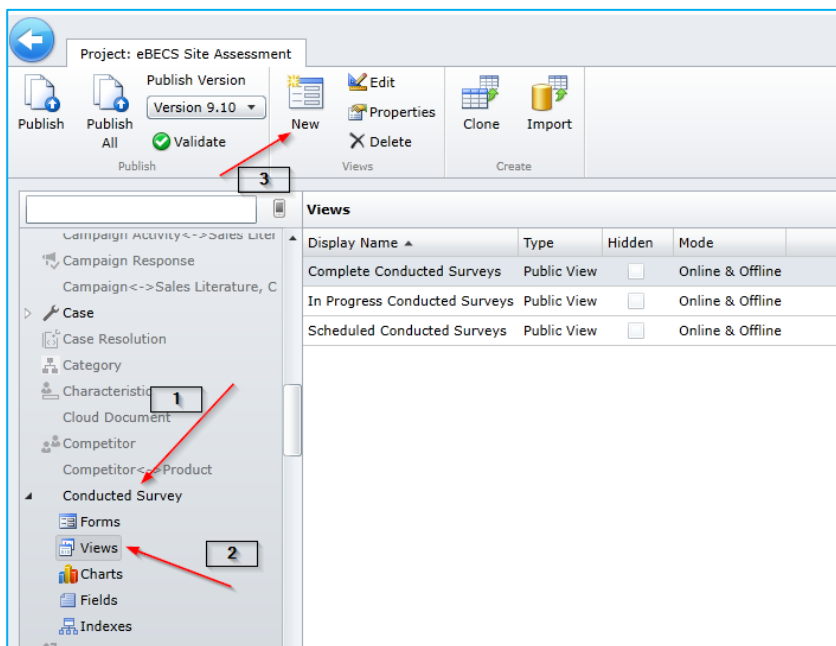

1. Scheduled Conducted Surveys
2. In Progress Conducted Surveys
3. Completed Conducted Surveys

### 2.1.8 How to create view

To create views, need to follow following steps

1. Navigate to entity
2. Click on views
3. Click on New
4. Give the name of the view and set Type to Public

## 2.1.9 Create Scheduled Conducted Surveys View

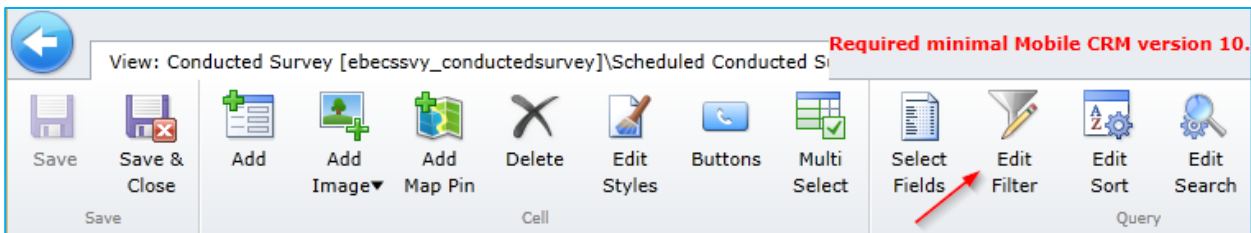

Any field available in the Fields Explorer can drag and drop in to the view. Using properties can change the text properties.

The screenshot shows the Designer tool interface with three panes: Properties, Designer, and Fields Explorer. The Properties pane on the left contains settings for the selected text box, including View (Columns: 0, Auto Grid: 0), Row (Default), Name (Default), Width (240), Height (40), Color (#00000000), Selected (#00000000), Next Wide (Default), Cell (Left: 8, Top: 2, Width: 227, Height: 24), Kind (Text), Style (primary), Binding (Value), and Binding (ehecssvy\_name). The Designer pane in the center shows a light blue text box labeled 'Name' with a blue border. The Fields Explorer pane on the right lists fields: Conducted Survey, Created On, Creator, Date, Modified On, Name (highlighted), Owner, and SurveyTemplate.

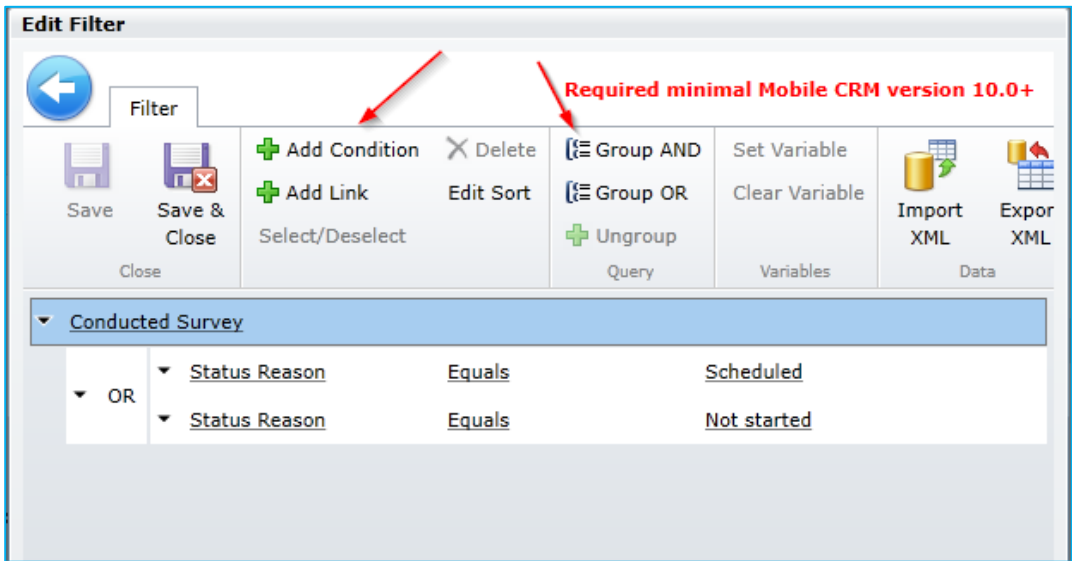

The screenshot shows the Designer tool interface after the 'Name' text box has been modified. The Properties pane on the left shows updated settings: View (Columns: 0, Auto Grid: 0), Row (Default), Name (Default), Width (118), Height (18), Color (#00000000), Selected (#00000000), Next Wide (Default), Cell (Left: 122, Top: 21, Width: 118, Height: 18), Kind (Text), Style (r\_gray), Binding (Value), and Binding (ehecssvy\_surveyt). The Designer pane in the center shows the 'Name' text box with a blue border and a blue background. The Fields Explorer pane on the right lists fields: Conducted Survey, Created On, Creator, Date, Modified On, Name, Owner, and SurveyTemplate (highlighted).

Adding Filter to the view

Click on the Filter Editor in the ribbon then it will appear the filter popup window. Using filter conditions can set the records which should be show in the view.

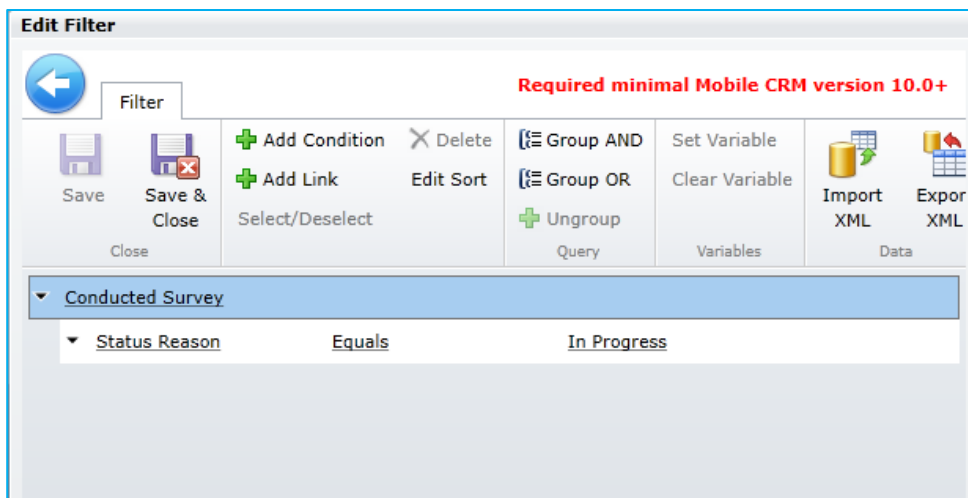

Using Group option can group multiple conditions together

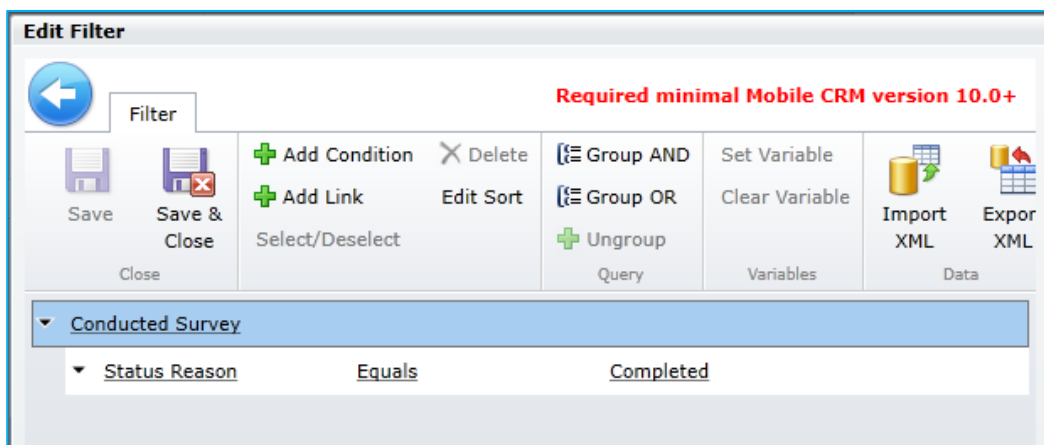

### 2.1.10 Create In-Progress Conducted Surveys View

This view **use same fields like Scheduled Conducted Surveys View** but with different filter conditions.

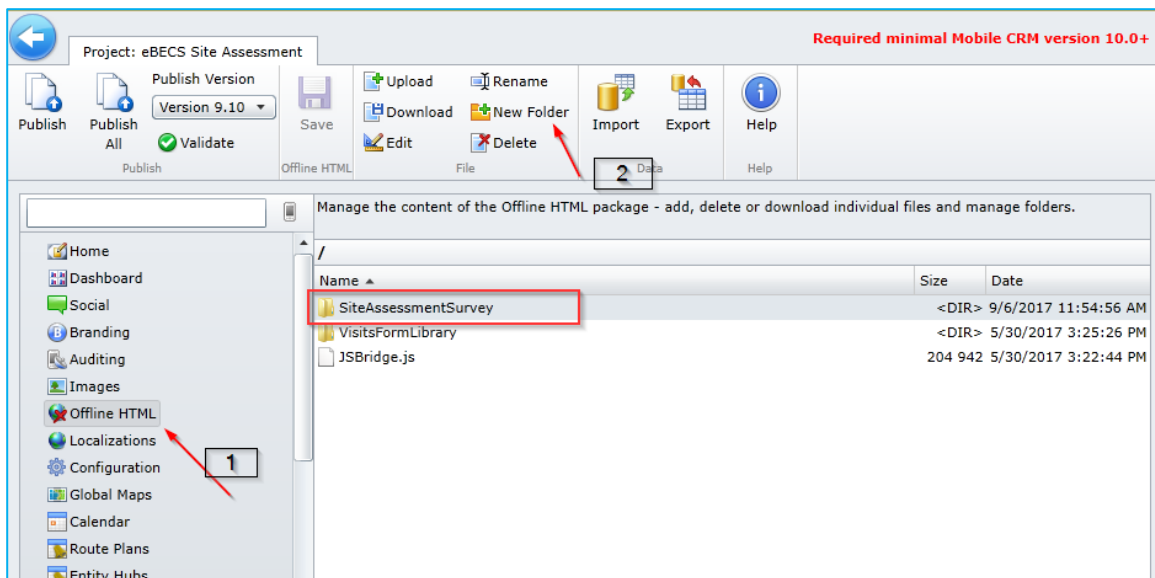

### 2.1.11 Create Completed Conducted Surveys View

This view **use same fields like Scheduled Conducted Surveys View** but with different filter conditions.

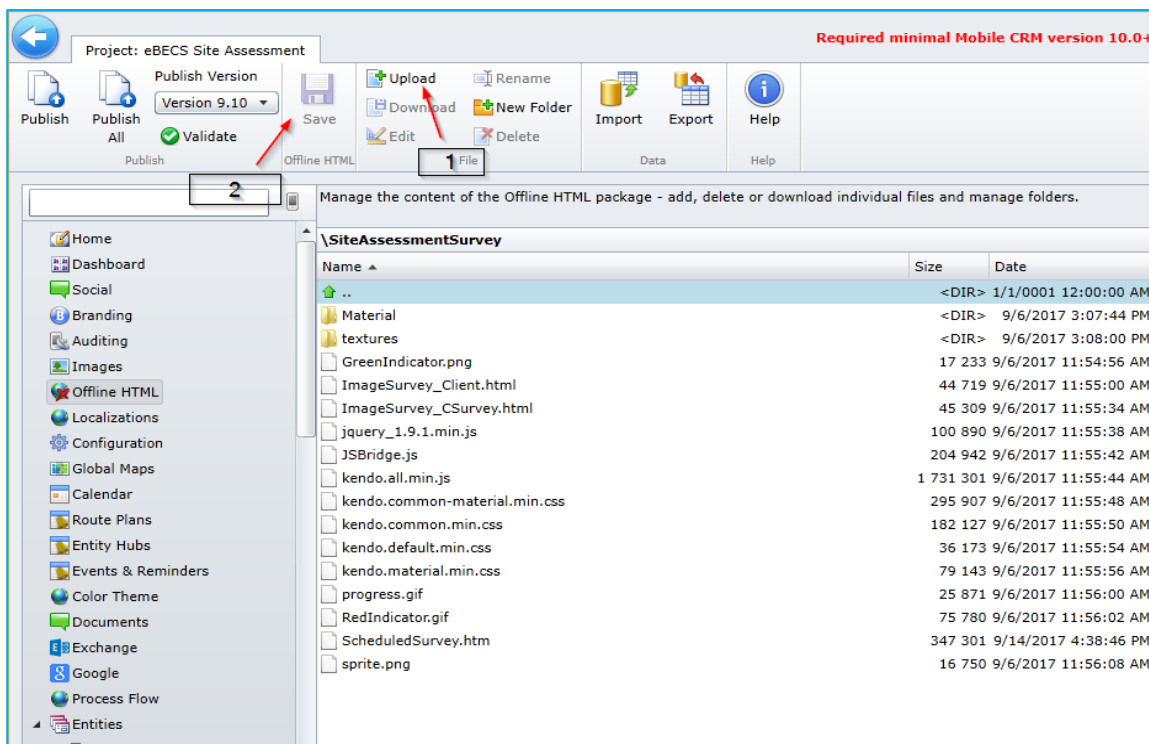

### 3 Setting-up Offline HTML Pages

Go to Offline HTML then create folder name called “SiteAssessmentSurvey”. Upload necessary components which taken from correct TFS branch.

Double click on the newly created folder and open it. Then upload the following content taken from TFS. Finally save the modifications.

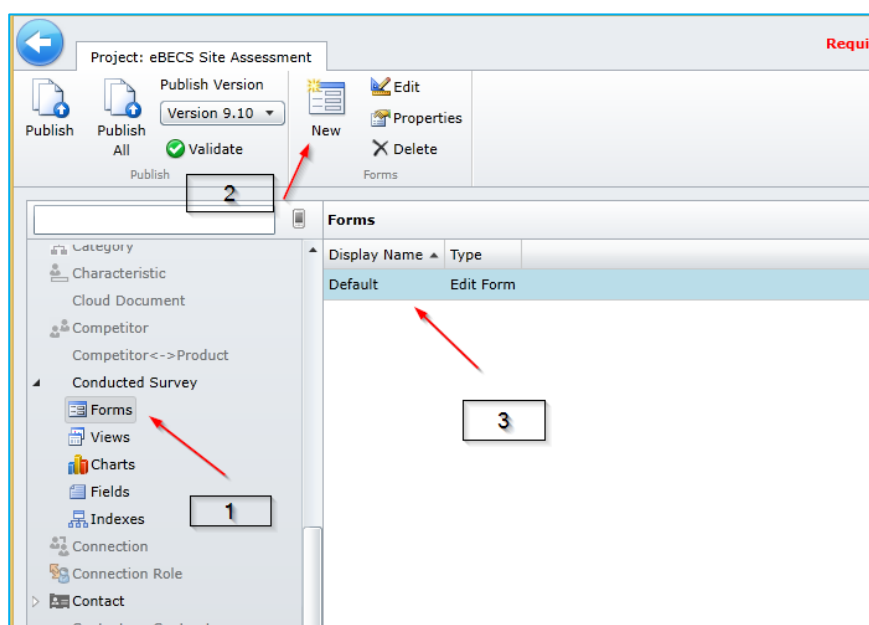

## 4 Create Survey Form and Setting Up

### 4.1.1 Create Survey Form

Follow following steps to create Conducted Survey form

1. Click on Conducted Survey and open the Menu
2. Click on Forms
3. Click on New
4. Set "Default" as name of the view

To complete Survey form need to perform following tasks

1. Create tab with survey details
2. Create iFrame tab for Take Survey
3. Create iFrame tab Image Survey
4. Create Signature tab (Media Tab)
5. Create List tab for Responses

For more details how to create iFrame tab, Media Tab and Detail List refer the Woodford reference guide.

This is how completed form looks like

Form: Conducted Survey [ebecssvy\_conductedsurvey]\Default

Required minimal Mobile CRM version 10.0+

## 4.1.2 Create Tab with Survey Details

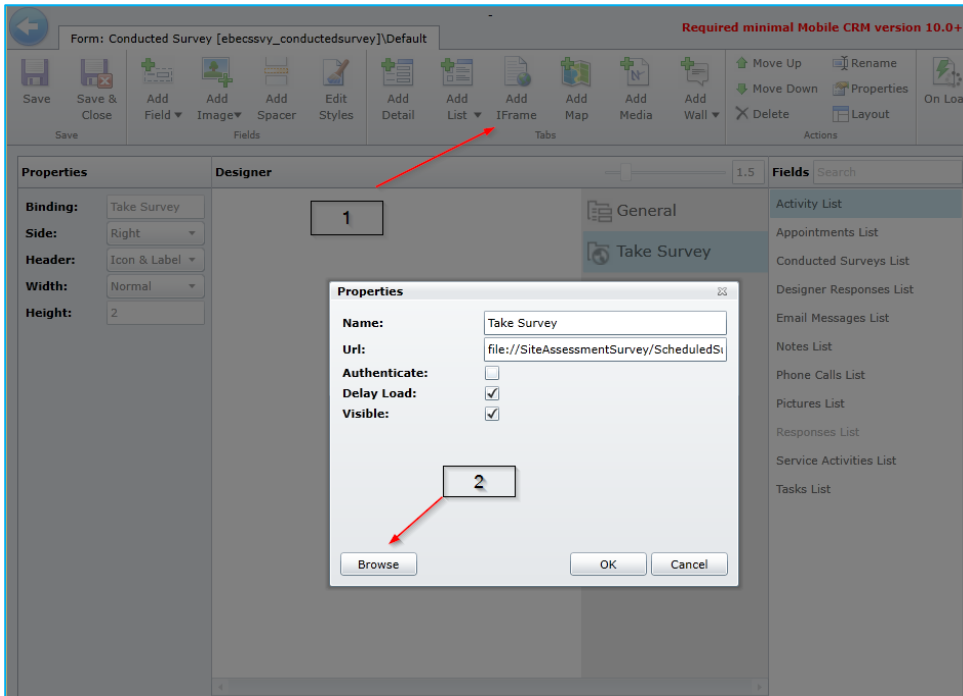

To add fields to general tab select the general tab and click on Add Field button. Then user can add the field to the tab. If user need to delete the field from the tab, select the field first then click on delete. If user need to re arrange the order of the fields, select relevant field then drag and drop to new position.

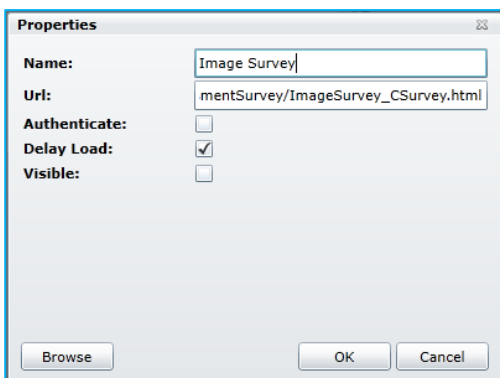

### 4.1.3 Adding Take Survey iFrame

First click on Add iFrame button and link “ScheduleSurvey.html” file using browser action.

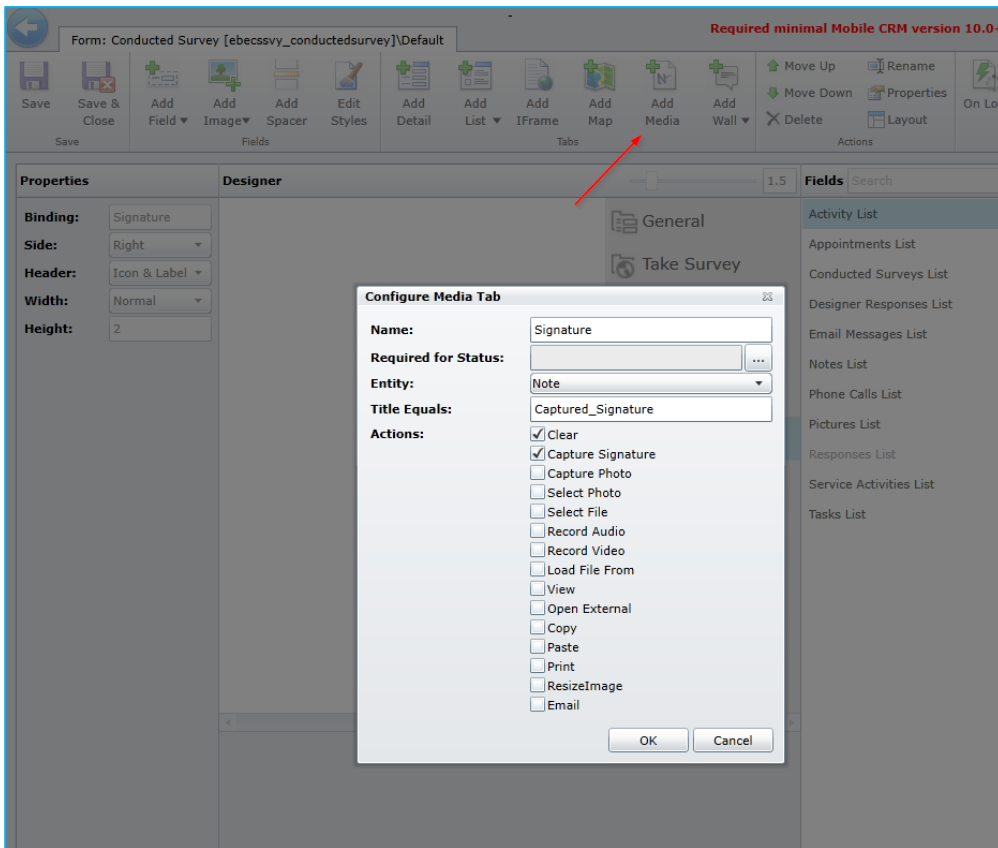

### 4.1.4 Adding Image Survey iFrame

Click on Add iFrame button and link “ImageSurvey\_CSurvey.html” file using browser action.

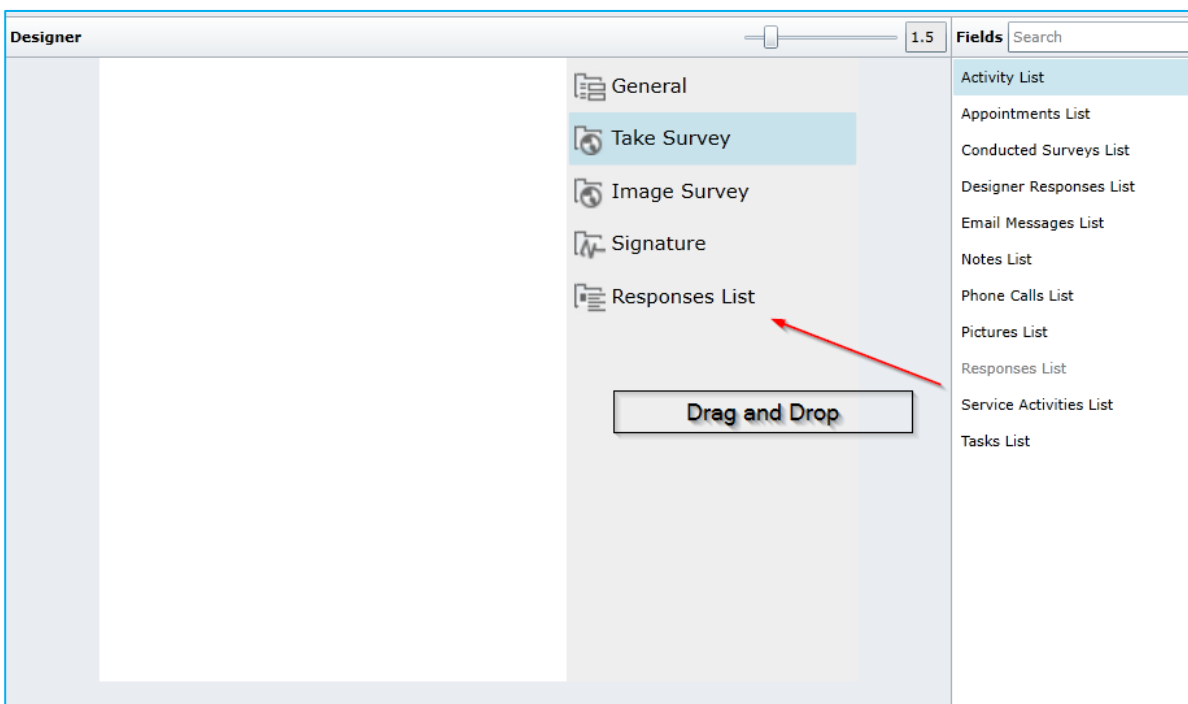

### 4.1.5 Adding Signature Tab

Click on Add media tab, then it will show up property window then fill it with following setting

#### 4.1.6 Create Response List Tab

There are lists available for Conducted Survey entity based on the relationship. Use list pane to drag and drop list to the form.

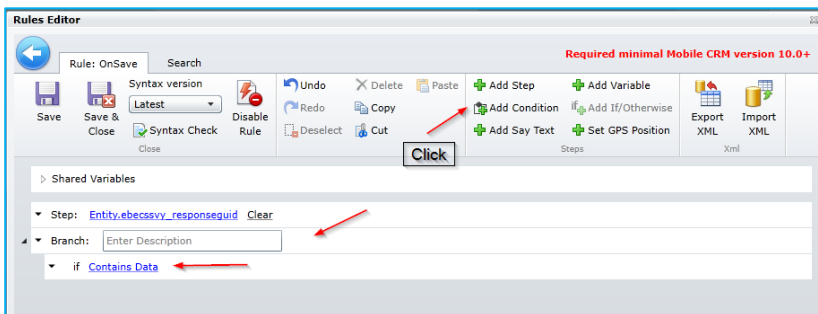

#### 4.1.7 Configuring On-Load, On-Change and On-Save events for Take Survey

To view already configured tabs based on the status of the survey, need to configure on load, on change and on save events.

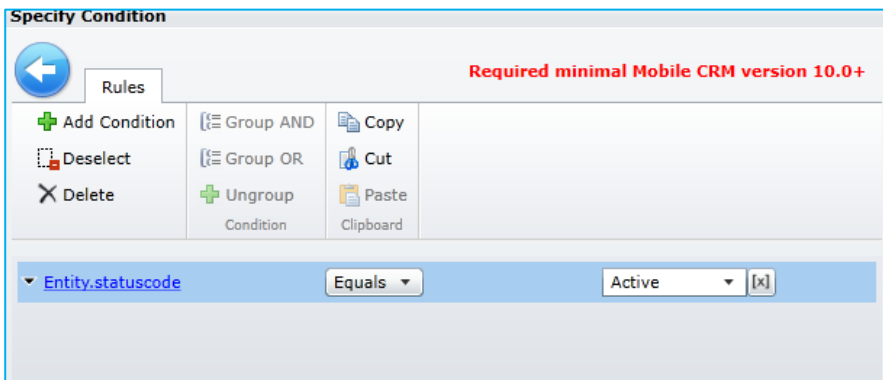

#### 4.1.8 How to Add Condition

To add condition click on Add Condition button and setup if condition like following.

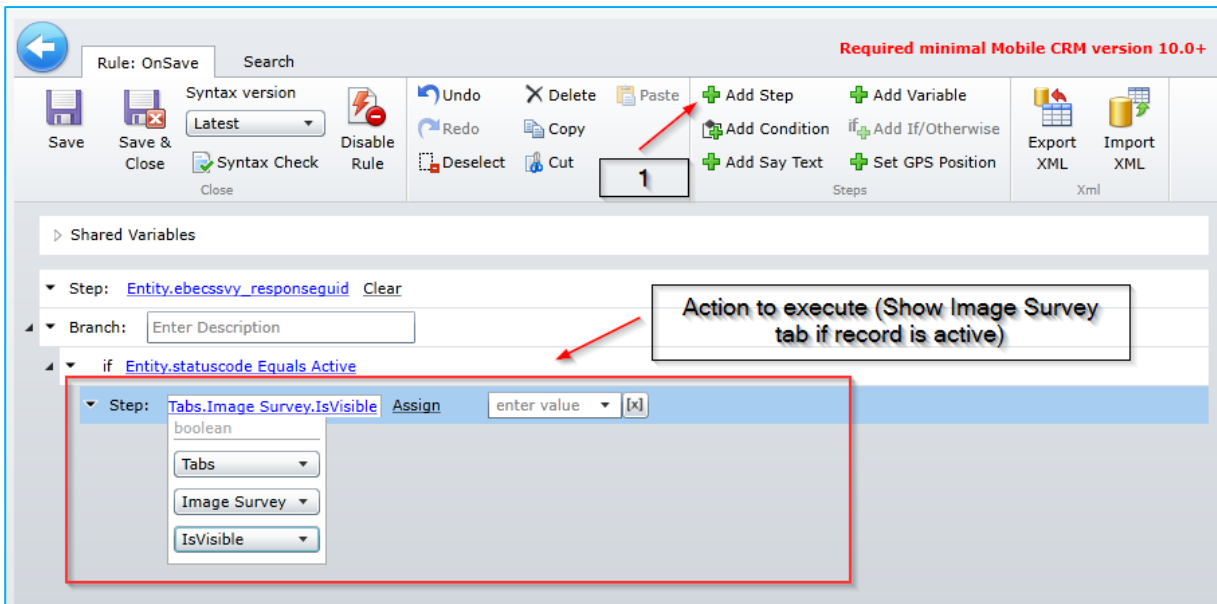

#### 4.1.9 Configure If statement

Click on condition already added by Woodford and it will pop up a window which can configure IF condition based on user preference.

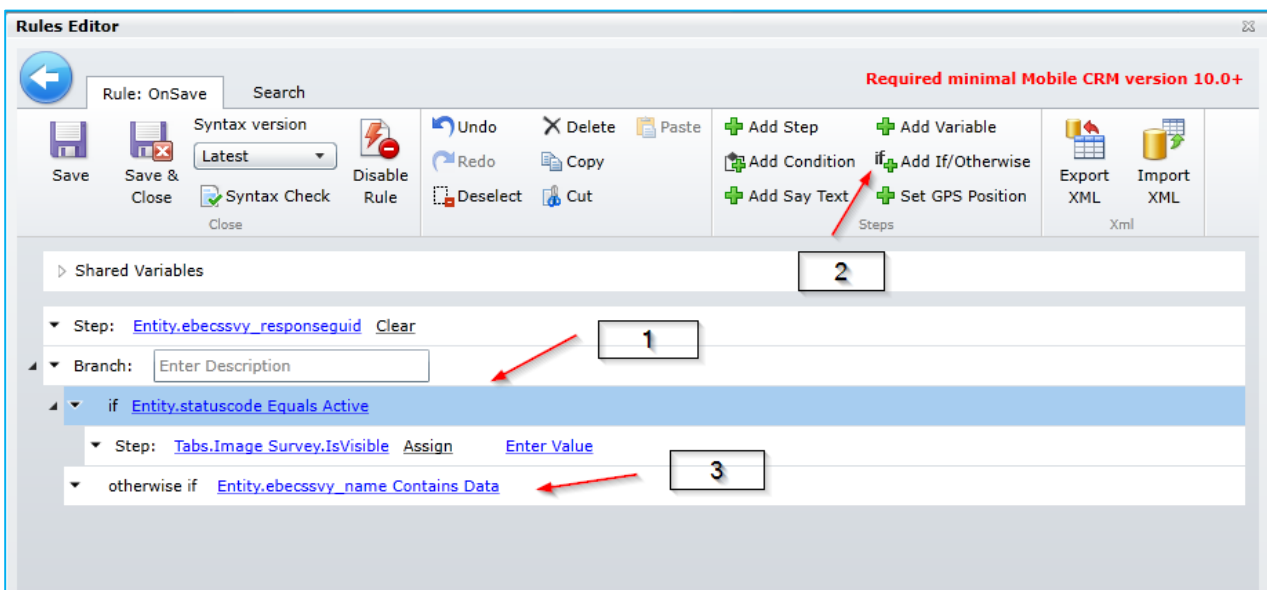

#### 4.1.10 Add Step

After configure the IF condition user can add Step which contains the action which execute after meet the criteria of IF condition.

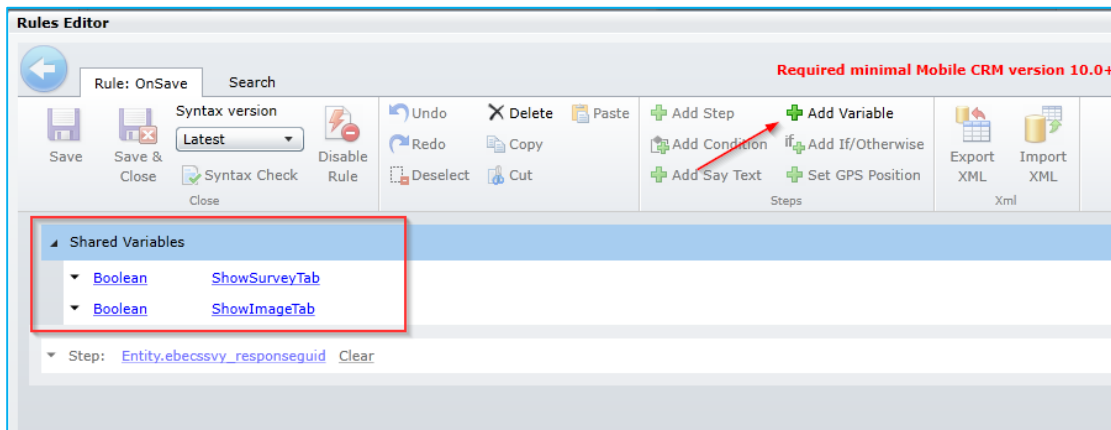

#### 4.1.11 Add If/Otherwise

To add Otherwise if need to select exiting If condition or Otherwise if condition. Then click on Add If/Otherwise and it will add otherwise condition to the rule edition. Use can configure the otherwise if condition like If condition or leave it like an else condition.

#### 4.1.12 Adding Shared Variables

Woodford projects allow users to create shared variables and use them among any events in the form. Can configure shared variables like following.

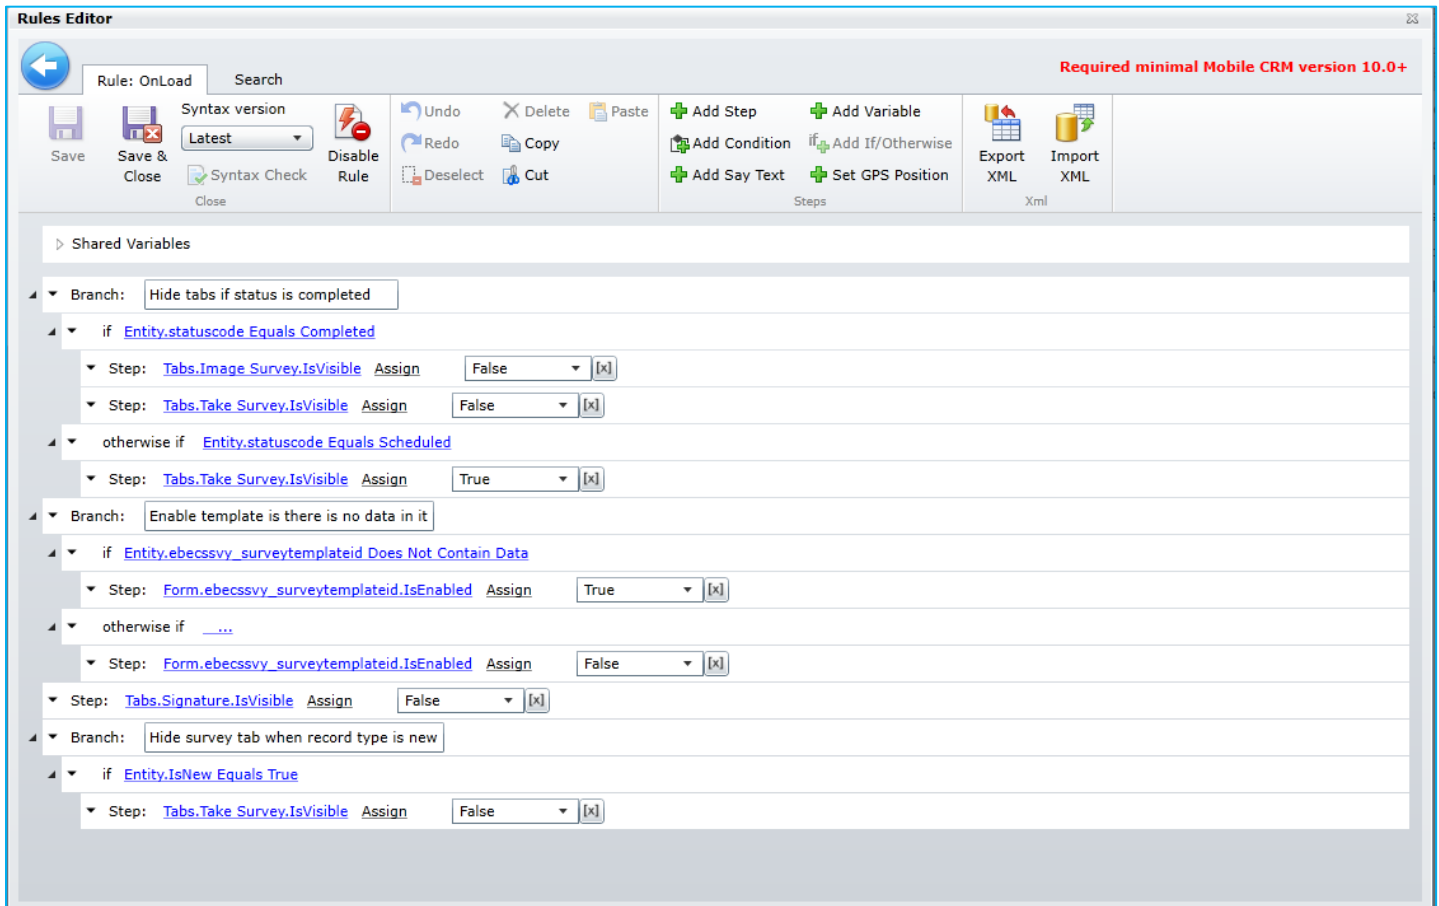

#### Note:

- Make sure to save after modify any of steps, condition and etc.
- Configure events after do all entity fields configurations and upload offline resources.
- Entity refer the entity record which open through the form

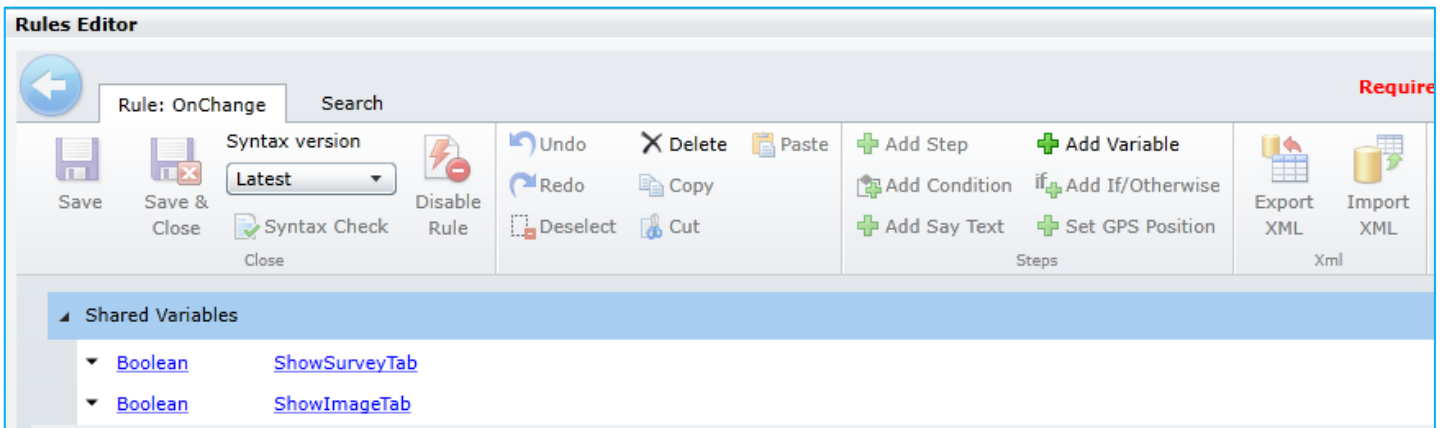

### 4.1.13 Configure On Load Event

Using conditions, steps and otherwise steps configure on load event like following.

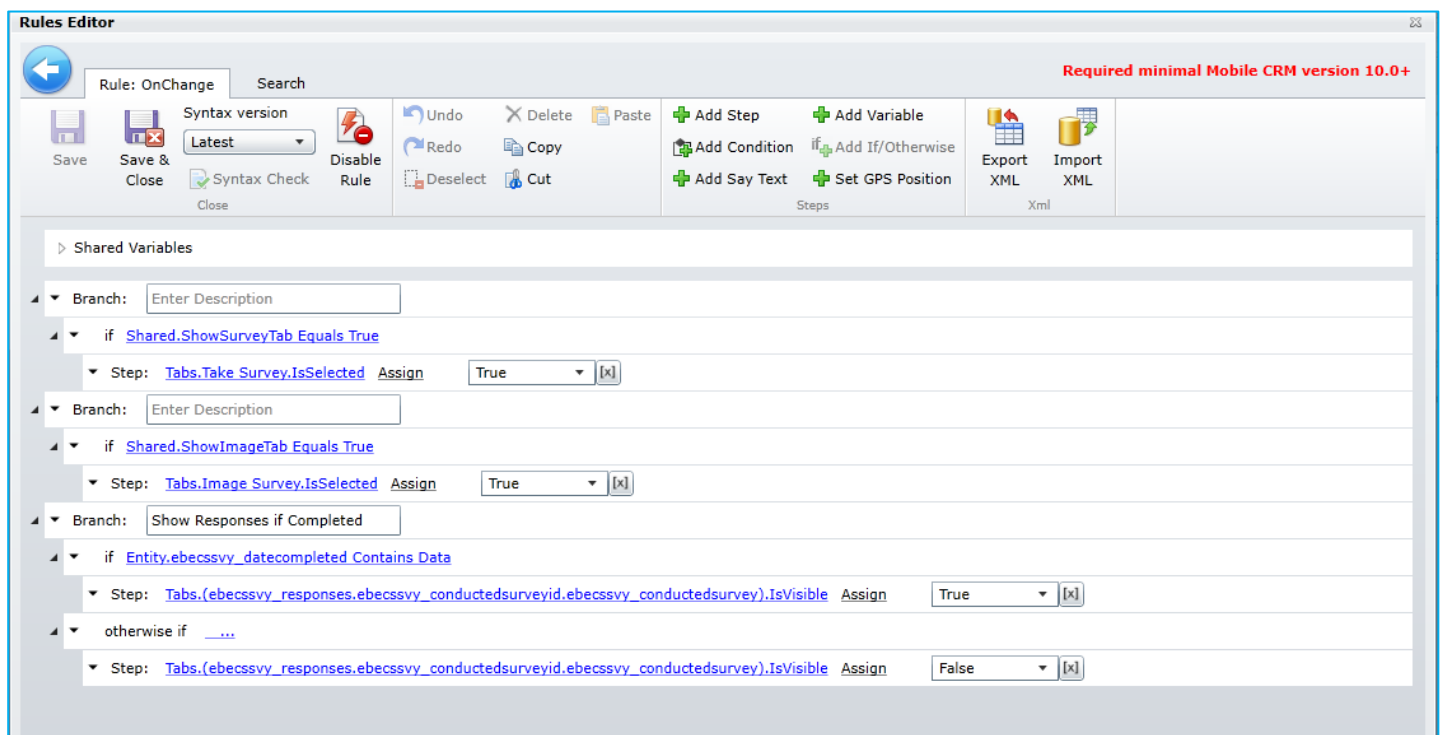

### 4.1.14 Configure On Change Event

Add two Boolean shared variables like following

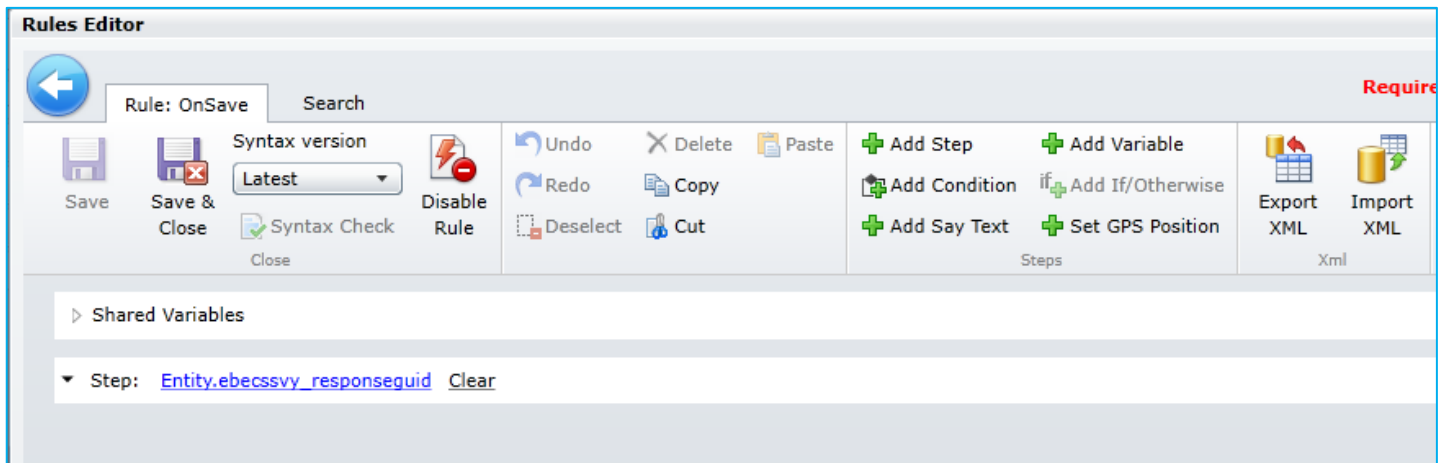

Using conditions, steps and otherwise steps configure on change event like following.

#### 4.1.15 Configure On Save Event

Configure on save event like following,

After completing all the customizations, make sure to publish the project. Without publishing solution it won't affect the changes.
