Powell 365

Powell 365 is an Office 365 intranet solution that is designed to drive communication and collaboration between coworkers, from anywhere, at any time, on any device and in any language. Our personalized portal pages respond to all employee needs. Corporate news, knowledge management and employee services keep everyone in the know. Based on Microsoft Office 365 and SharePoint, with Powell 365 you can streamline your deployment process and provide an engaging portal design while taking advantage of everything Microsoft technologies have to offer.

Powell Hub

Powell Hub is the one-stop productivity service. With this all-in-one application, your employees can safely access their business apps, corporate documents and company information in one click. Offer employees a foundation of business applications, push specific apps, and track usage with corporate analytics. This workspace for personal productivity will transform daily operations and bring all applications into one single platform helping employees stay focused.

Powell Teams

Powell Teams offers comprehensive features in order to streamline the usage and the management of Microsoft Teams. For end users, Powell Teams offers a full fledged dashboard to easily access Teams information that counts most. For the IT department, Powell Teams offers comprehensive capabilities to govern and manage Teams lifecycle. Also, it enables to create Teams based on pre-configured templates.

Powell Manager

Powell Manager is the back-end governance tool that helps our partners and customers design and manage their digital workplace projects over time, in a fast and cost-effective way. Benefit from ready to use out-of-the-box templates, design all aspects of your portal structure, integrate your potential custom developments and define your mobile app, all from one fully secured place.
