# Clever Handheld for Warehousing

Automatically drive productivity & optimize warehouse capacity

## Do you struggle with accurate inventory?

Does keeping track of what inventory you have where, what's physically in your warehouse against the figure that shows on Business Central a challenge? Are you always in doubt because you never know if there are more movements still out there?

Clever Handheld for Warehousing makes booking transactions in Dynamics 365 Business Central as they happen, quick and accurate. What's in your warehouse is immediately reflected on the computer screen, handling all main warehouse processes for every type of inventory transaction from receipts and put-aways through to replenishment, picking and shipping.

## Product Overview

Clever Handheld for Warehousing updates instantly and accurately in Microsoft Dynamics 365 Business Central – enable your staff to process and forget, not just giving the traceability and performance reporting you've dreamt of but ensuring what's on your system is always up to date with what's physically there.

### Benefits

- Drive the right priorities to the right people as soon as they are needed.
- Optimized to make every process fast and easy, from receipt to shipment
- Full validation of all data as it input, no more scribbles you can't read
- As flexible as you need, configure what information to capture or display.
- Enforce correct process for Lots, serial numbers & variants
- No waiting for paper or walking to a screen, complete audit of who and when
- See your real-time performance while there is time to make a difference
- Future proof V2 Extension for easy upgradability
- Use your chosen device from phones to ruggedised terminal

### Requirements

Dynamics 365 Business Central or Premium

A clean, simple, intuitive user interface and available for Android platforms

Does keeping track of what inventory you have where, what's physically in each warehouse bin against what's on Business Central a challenge? Are you always in doubt because you never know if there are unregistered transactions still out there? Have you struggled to get process followed because the perception is that it wrong anyway, so it doesn't matter?

You need the transformation that Clever Handheld for Warehousing brings. Make every transaction so quick and easy that your people will want to work that way. Get perfect accuracy with faster pick and put-away rates because suddenly everyone sees the vision you have. When it physically moves its instantly reflected on Business Central for every type of inventory transaction. That means you can do physical inventory counts whenever you want to, even as part of another transaction while you're at that bin anyway. Not that you'll need to of course, will each move accurately done, what's the need?

## Every Second Counts

In today's instant world, your cut off are getting later but your expected delivery is sooner. That means you have to work smart with minimum travel and no delays. You need to turn that inventory round and get it where it needs to be with minimum time and effort.

Clever Handheld provides the level of automation that ensures the right people are working on it as soon as its possible and you've got the best chance of success.

Getting and completing those processes faster and not being held up by inaccuracy means your volumes can increase and services standard improve. Those impossible requests are suddenly possible again.

Your warehouse staff will love it, who doesn't want to travel less and still finish quicker? No more going to a screen or printer to find out what to do next, no more blame for getting it wrong when the pressure was on. Everything they need is done on the move with the system watching their back to make sure they get it right.

With touchscreens and large buttons, the user interface is designed to work with gloved hands in even poorly lit environments.

## No major project, start today

Clever Handheld for Warehousing is a modern extension that can be installed and configured in minutes. Designed with simplicity and flexibility in mind it uses familiar touchscreen techniques that even glove wearing staff in dark warehousing will find easy. The consistent easy visuals mean no long training courses, five minutes after you start, they will be standalone proficient.

You get reporting on what they've done as well as what they still must do. Assign tasks to individuals or groups and prioritise what you need done next. Confidence that the data is accurate, and you know the requirement instantly means you left to do rather than confirm.

That accuracy means you can have confidence in what others both inside and external to your business can see. That leads to less emails and phone calls 'just to check'. Discrepancies are identified and resolved as soon as they appear breeding a culture of accuracy across your organisation.
