The Power of AvaTax: Real-time access to the most current rates and taxability rules within any ERP or billing system.

ADDRESS VALIDATION

The AvaTax calculation engine encompasses the most accurate and up-to-date address data available. Input addresses are automatically checked and corrected for spelling errors and inaccurate street names. Five-digit zip codes are appended to nine-digit accuracy.

SOURCING RULES

Using advanced geocoding technology, transaction addresses are pinpoint positioned within all applicable jurisdiction boundaries. Geo-positioning provides the basis for precise identification of tax jurisdictions and roll-up to a total tax rate.

JURISDICTION ASSIGNMENT

The AvaTax service includes researched and validated system tax codes which provide highly accurate product taxability assessments and ensures the correct rates are calculated for all products and services.

PRODUCT TAXABILITY

AvaTax is programmed with the latest information for handling destination based, origin based and hybrid sourcing rules, ensuring the most accurate possible assignment of tax rates for individual transactions.
