What is the problem and how do we solve it?

Problem

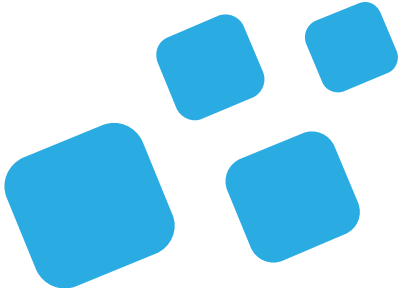

- Lack of shareable platform with standardized artwork data
- Lack of an integrated, simple and secure system for visual arts workers
- The systems available for cataloging are expensive and obsolete.
- Duplicate and complex works for galleries and museums

How we solve

- Integrated Management System
- Made to “never forget”
- Simple and intuitive management
- Build in the Cloud
- Mobile

Artyou is divided into apps

Security and Availability

High Security

In addition to saving you time in each process, the platform offers complete security both in storage and in the exchange of information, such as a bank.

Availability

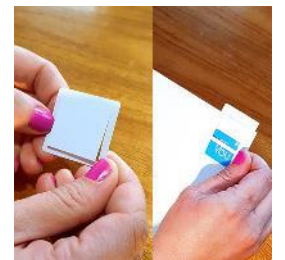

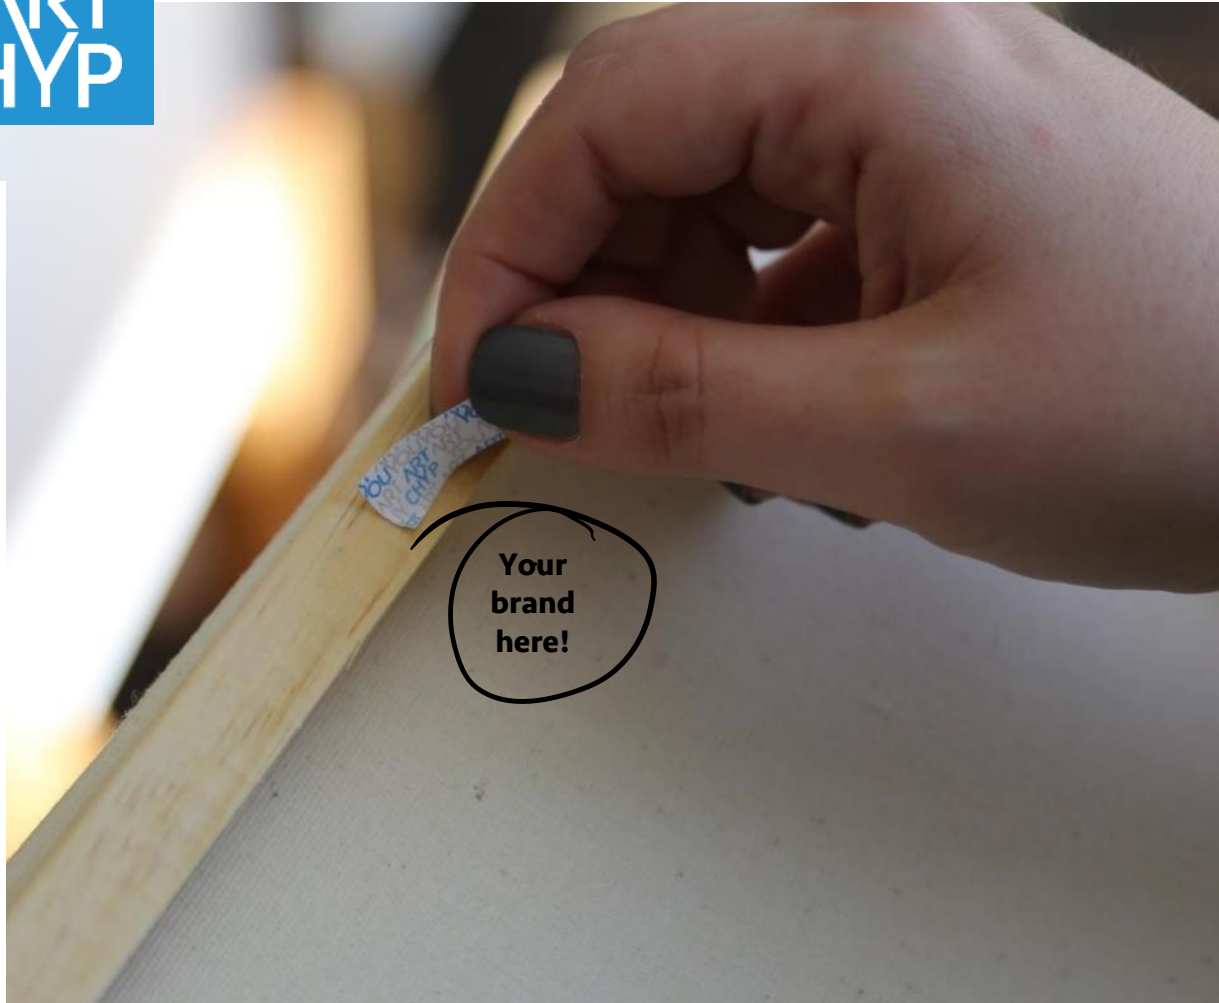

Our technology makes redundant backups on the best servers in the world, in Microsoft's Azure. Everything is saved in the cloud. You have access always when you need and share privately.

Artyou Global
Exclusive

- With our ARTCHYP, you and your team have quick access to the object's profile - exposed or stored in the collection - using only the smartphone
- Authenticity: perpetuate your brand in the artwork
- Management: Eliminate receipts, automate processes with suppliers such as framers, transportation, insurers, producers, curators.
- Interactions: the user can check that has received the artwork, that is doing a technical procedure, can include photos and assembly attachments for example.
- Create a history that is not lost with the ARTCHYP!
