

# Lets Encrypt Auto

Let's Encrypt Auto is a SaaS application for Microsoft Azure that creates SSL/TLS certificates for Azure Web Apps and auto renews the certificates before their expiration. It supports both the HTTP-01 and DNS-01 challenge types. Wild card domains (e.g. \*.mysite.com) is supported in an Azure DNS Zone. You can also use the REST APIs and Webhook to integrate with your applications.

- Create SSL/TLS certificates using the popular Let's Encrypt V2 API
- Installs SSL/TLS certificates in your Azure Web Apps
- Supports HTTP-01 and DNS-01 challenge types
- Supports wild card domains (\*.mysite.com) in an Azure DNS Zone
- Automatically renews certificates 20 days before expiration
- Provides a REST API and Webhook to allow for integration in your applications
