CaRD Cloud Connector for SAP & SharePoint

...connecting world's best technologies

Document Library

Use SharePoint Document Libraries out of the box. You can create your own columns and you can use own views to display the library.

Document Sets

The connector supports SharePoint Document Sets. The information of the Document Set will be retrieved from SAP.

Folders

You can structure your SharePoint Library with folder structures based on the information of the related file in SAP

Meta Data

The metadata can be customized in SAP using a graphical interface to drag & drop the customizing relations. No developments are required to define the meta data.

Content Types

We also support SharePoint Content Types for Meta Data in SharePoint. The Content Types can be customized very easy.

S/4 HANA

The connector is compatible with S/4 HANA SharePoint online and onPremise. It is also compatible with prior SharePoint and SAP releases as well as with FIORI and other technologies.

SAP integrated

You can use the integrated SAP ECL viewer to display the files after checkin into SharePoint.

Custom URL

You can customize customer specific URLs to display the files in SharePoint. This allows you to secure your files with SharePoint roles

Cloud based

We offer a cloud based version for SharePoint online and a version for SharePoint onPremise

Dashboard

We provide a dashboard to manage all features in SAP. It can also be used to monitor and simulate different processes.

Easy to setup

Our technology allows you to start with our connector in a short time period. This saves money and reduces the project duration

Enhancements

Flexible solution which can be enhanced by the customer, this allows us to offer best solutions

CaRD Connector for SharePoint & SAP

The screenshot displays the SAP S/4HANA interface for document management. On the left, the 'Display Standard Order 6486: Overview' is shown with fields for Standard Order (6486), Net Value (171,013.00 USD), and various party and reference information. The main area is titled 'Data Entry View' and shows document details: Document Number (100000001), Company Code (1010), Document Date (04.10.2016), Posting Date (28.11.2016), and Fiscal Year (2016). Below this, an 'Attachment for 101001000000012016' list is visible, containing one entry: 'Invoice PDF Document' created by Jochen Bühler on 24.07.2019. A table at the bottom left of the screenshot shows CoC, Item, and Account details.
