**SYNCHRONIZATION**

- **MULTIPLE SHOPS**
- **DIRECT SYNCHRONIZATION**
- **SYNC ITEMS IN BOTH WAYS**
- **SYNC STOCK IN BOTH WAYS**
- **ORDER NOTE: SYNC TO SHOPIFY**
- **SYNC ITEMS IN BULK**
- **SYNCHRONIZATION OF EXTRA ITEM TO SETUP**

Manage all your shops in one Dynamics 365 Business Central. For each shop you have a separate setup at your disposal.

Synchronize directly without using a converter tool. Avoid two points of failure and use a better, more stable and more efficient connection.

Upload your existing products from Microsoft Dynamics 365 Business Central into your Shopify online store and the other way around in a few steps.

Sync your stock from Microsoft Dynamics 365 Business Central to Shopify or from Shopify to Microsoft Dynamics 365 Business Central.

The order note in the Shopify store will be synced to the Shopify order in Dynamics 365 Business Central to a new field “Work Description”.

Sync your stock from Microsoft Dynamics 365 Business Central to Shopify or from Shopify to Microsoft Dynamics 365 Business Central.

Setup new fields “Sync Item Extended Text” and “Sync Item Attributes” on the Shopify Shop Card in Dynamics 365 Business Central.

Transfer orders automatically into Microsoft Dynamics 365 Business Central and go through the entire flow in a few steps.

Based on a template, new customers in Shopify are automatically created in Microsoft Dynamics 365 Business Central.

Manage Shopify items efficiently in Microsoft Dynamics 365 Business Central based on a predefined template.

Automatic e-mail notification with tracking code once the order is flagged as “shipped” in the Microsoft Dynamics 365 Business Central system.

**ORDER PROCESSING**

- **AUTOMATIC CREATION OF ORDERS**
- **AUTOMATIC CREATION OF CUSTOMERS**
- **AUTOMATIC CREATION OF ITEMS**
- **DELIVERY MAIL NOTIFICATIONS**

Fill the SKU on an item in the Shopify store by filling the new field “SKU Type” on the Shopify Shop Card in Dynamics 365 Business Central:

- Item No. (default value)
- Variant
- Barcode
- Item No. + Variant

If you choose the option “Item No. + Variant” as “SKU Type”, you also have to define a “SKU Field Separator”, e.g. |.

**GENERAL**

- **No double entry**
- **Less human error**
- **Streamline Easy setup**

Avoid double entry of data such as customers, items, orders and shipments through synchronization.

Limit human errors by automating your process.

Makes fewer errors and delays by streamlining the process using our Shopify Connector.

Limit human errors by automating your process.
