

## What is PowerShare?

If you've ever sent a client a document and wondered whether they received your email or if they ever opened the document you asked them to read, then you will *love* PowerShare. This Dynamics CRM document sharing add-on gives you the power to create a bundle of documents in CRM, send those documents to a client, and see whether they received the email and if they viewed the documents in your bundle. The best part? Everything is done from within Microsoft Dynamics CRM!

- Easily create your document bundles with the PowerShare wizard
- Add notes to each document or the document bundle as a whole
- Unique bundle URL gives you control over who has access to each document bundle
- Set an expiration date on each document bundle, giving clients a limited time to access the documents
- Be one step ahead of clients by tracking:
  - If the email with the document bundle was received and opened
  - How many times the document bundle was opened
  - If any of the documents within the bundle were opened and how many times

## How Do I Get Started?

Try any of our PowerPack Add-ons FREE for 30 days with no risk and no pressure to commit! There are no setup fees, no long-term contracts (simply month to month), and no credit card information required! Click [here](#) to learn more.
