Cloud Based, School Management ERP to record, manage, monitor and analyze; all activities and processes related to Student, Teacher & School Administration.

STUDENT LIFECYCLE

Lead / Enquiry Management

Run, Track and Manage various student acquisition campaigns and enquiries via various mediums such as Social Media, Digital Marketing, SMS, Email, Advertisement etc. Creates a database of leads simultaneously. Assign & Nourish leads in data-base with tailored content and regular follow-ups.

Admissions

School can perform entire Admission process ON-LINE using MasterSoft ERP. Create admission notifications, on-off line Prospectus sales & registration, Scrutiny & offer letters / SMS to parents. Admission module is linked with Lead management system.

Fee Collection

All Fees can be collected online or on School / Bank counters in one / multiple installments. Define various fees, configure fee rules & create fee demand. All fee activities like fee refund, write-off, outstanding fee reminders, fine collection, fee clearance, etc. can be managed. All Essential Fee related reports like DCR - Daily Collection Report, Outstanding fees report can be generated.

Student Information Management

Manage all student related activities from a centralized platform - admission record, section allotment, roll list, admission register, monthly attendance sheet for Teachers, Identity Cards, Board Reports etc. Govt & Compliance Reports can be generated in the defined formats.

Enables Continuous Assessments and Evaluation of Students and generation of School Certificates - TC, Bonafide, Character etc.

Generate various MIS Reports and User Defined reports

Time Table

Define class time table by defining subjects, batches, section and classrooms in the system. Respective time table of students, faculties is visible in their respective logins.

Class Attendance

Attendance can be marked and monitored in many ways - manually, via biometric, RFID or mobile application (Atcovation). Teachers can view class-wise, pupil-wise attendance through their respective logins. Auto SMS, Email or App Push Notifications to parents informing about pupil attendance can be triggered.

Bus Management

Define various bus routes, bus drivers, pick up points and allot students to buses. Bus can be tracked live using MasterSoft Atcovation App - by both school and parents. Parents can be notified prior to bus arrival. Trigger auto-alerts and reminders for upcoming insurances and servicings, etc.

Hostel

Manage hostel admissions, hostel fees, room allotment, mess & monthly student mess bills, student hostel attendance. Rooms can also be allotted to guests and visitors. SMS and Email notifications can be triggered as per workflows.

Your data stays with you !

ONLINE TEACHING AND LEARNING

Online Teaching

Teachers can upload teaching materials such as syllabus, teaching plan, lecture notes, question banks, e-library links, assignments, homework, study material (audio & video files) etc and create online MCQ & descriptive tests and Quiz. Students/Parents can access and download all the study resources from their respective logins. Students can appear for test and submit assignments online; retest can also be requested from student login. Teachers can evaluate assignments

Communication Forum

Teachers can create class-wise / batch wise student forums to drive student collaboration. Students can chat personally or ask questions to teachers in forums. A special internal institute e-mails system is provided for quick teacher-student/parent communication

ASSESSMENT, EXAMINATION AND RESULTS

Define your school's assessment pattern and examination process in ERP (compatible to all Boards). Define subjects, batchwise - classwise exam pattern & schemes and assign weightage to different parameters of assessment. Create exam timetables, assign invigilation duties, seating plan and print necessary exam conduction reports as attendance signing sheet etc.

Result is calculated according to defined assessment patterns. Teachers can enter pupil marks from their respective logins. Processed results, can be made available on student & parent login and mobile application. Analytics powered dashboards depict records in graphical form to identify areas for improvement. Grade Card, Admit Card, Tabulation Register, Mark list, other reports can be generated from the software.

All institutes within a society can be monitored from a single Dashboard.

SCHOOL ADMINISTRATION

Accounts

Handle day to day accounting operations such as voucher entries, bank reconciliation, payments easily with accounts module. Generate accurate account reports like cash-bank-ledgers, day book ledgers, trial balance, income and expenditure statement, balance sheet, receipt and payment statement. Accounts Module which is integrated with fees, payroll & bus module to facilitate quick and precise operations and eliminate repetition.

Payroll

Automate salary calculation and payroll processing, by defining pay rules, earning and deduction heads. Processed salary can be transferred to the Accounts Module for further processing and distribution.

Various configurable payroll reports like pay slips, salary certificates, abstract, bank statements, attendance report, annual salary report etc. can be generated. MIS reports according to payscale, designation, etc. can also be produced with the ERP.

Website

Give your School a global gateway through an established Web presence. Websites can be static and dynamic. Publish forms, photo gallery, school notices and news, ERP login links etc.

Library Management

Automate all library tasks such as book procurement & payments, accessioning, circulation - issue-return, stock verification, binding, etc. Provides option for withdrawal, write-off, indexing, of books. Generates all required reports such as - Accession Register, Issue-Return Report, Library Card, Overdue notice, MIS Reports & Budget Analysis. Automates serial control Activities. It provides OPAC and OPAC App for easy Book Search a/c Title, author, subject, publisher, keyword etc.

Dashboards and Reports

Access actionable real time information from data stored such as applied admission count - class wise and year on year - by category - gender, vacancy, geography; fees paid and outstanding summary class wise and Y-O-Y etc in graphical format through analytics powered dashboards as per school hierarchy. Comprehensive user defined reports such as daily collection, accounts, payroll, application stage etc can be generated for all activities and processes for better decision making and compliance.
