

Our Story

We are an innovative tech company specializing on Data Analytics solutions based on Microsoft platform. Read further...

Our Vision

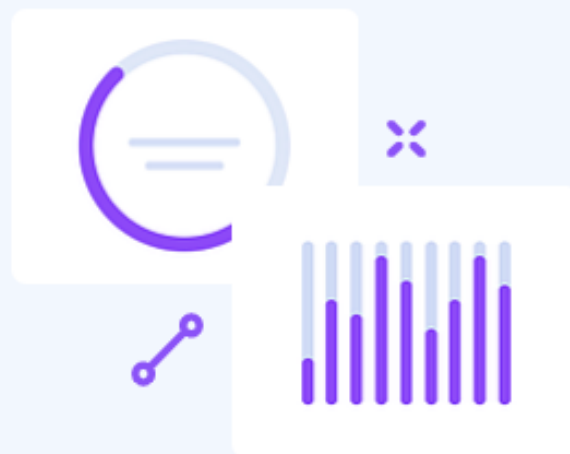

To reduce data analytics deployment time from years to days thus allowing the resources to concentrate on the actual analysis of the data.

Technology

Our solution is based on Power BI, which based on [Gartner research](#) is the best data analytics platform in the world.

How Does It Work?

Fast & Furious

Most of the business processes are similar in nature therefore it is not efficient to custom build everything, all the time. RoiBot utilizes Common Data Model. However it is possible to extend this model to suit custom needs. Our solution will be implemented in days not months or years.
