

# VLC Smart Shipping App for Microsoft Dynamics 365 Business Central

VLC Smart Shipping uses multiple parcel carriers like: UPS, FedEx and USPS. It can be easily integrated with the corporate intranet using industry standard connection tools. Shipping can assist shipping departments run faster, simplify outbound logistics and order management. Discover how improved shipping processes will save you time and make it easier to do more business and stay ahead of the competition.

### Highlights:

- **Smart Ship:** Integrate Business Central Sales Orders data to process shipments easily and update information to business central with easy of multiple clicks.
- **Rate Shop:** Shipping Rates to request pre-ship rating information and to determine estimated or courtesy billing quotes.  
Shipping Rates will provide a list of rates for all available services from different shipping carriers.  
This will be helpful to compare and select the best carrier and service for a shipment.  
Rate shop Provides current Negotiated Rates and List Prices.
- **Special Packages:** Special Package form is used to process shipments for Items which are not relate or created sales orders, like samples, gifts or missing items on previous order shipments.
- **Address Validation:** Address Validation to validate or complete the recipient addresses information before you ship a package.  
Correct addresses on the shipping label will eliminate delivery delays and additional surcharges.
- **Freight Shipments:** Freight shipment is identified by a classification number. This number indicates the type of product in the shipment and affects not only carrier charges but also the overall shipping process.
- **Freight Pricing:** Freight Pricing Provides Charge shipping fees by weight or use category or flat rate pricing.
- **LTL Shipment:** LTL Shipments helps to update Shipping Agent and Service Code with cost and Tracking numbers to post the Sales Orders which are to be shipped by LTL carriers other than FEDEXLTL and UPSLTL Shipments.  
These Form lists all the outstanding Sales Orders which are to be shipped by LTL carriers other than FEDEX and UPS LTL Shipments.
- **Return Packages:** Return Shipments is also made easy to process from posted Packages with very few clicks.

- **Shipping Special Services:**  
No. of Shipping Special Services are available based on Carriers (FedEx, UPS and USPS) for local and international shipments  
Available Options will be different for FedEx, UPS and USPS.
- **Shipping Analytics:**  
Shipping Analytics provides the overview of the Shipping department in charts and graphs for Business Analysis.  
Information and comparison are provided for critical data elements like No. of packages packed, shipped, Carriers and Services used for shipping base on daily and Monthly.
- **Shipping Labels:**  
The Shipping Labels and documents are automatically received and sent directly to the assigned printer.
- **Manifest:** Shipping manifest process is usually performed at the End of the Day to send the details of all the packages processed to the carrier.
- **Email Notification:** Generates email delivery notifications and sends them to end customers.
- **Auto Configuration:** Automatically configure shipment information setup at the time of installation. Just need to setup Shipping carriers account related information.
- **Multiple Shipments:** Provides Multi-package functionality to bind all the packages of a shipment with easy process.
- **Identical Packages Shipments:**  
Processing identical packages is made easy as any number of identical packages will be processed automatically by mentioned the no. of shipment count on processing the first package.
- **Delete Shipment:** If any Shipment data went wrong, we can perform cancel shipment to carriers and can-do reshipment immediately.
- **Tracking Shipments:** Shipments tracking information provided directly from carrier's website information for accuracy.
