Manager**

INTRODUCTION POWELL MANAGER

INTELLIGENT WORKPLACE SUITE BY POWELL SOFTWARE

OOTB SharePoint/Teams

Powell 365

Office 365 Intranet Portal

Powell Teams

Teams Collaboration

Powell Hub

Universal Digital Workplace

Powell Manager

A Unified Platform to
Design, Deploy and Manage
the Corporate Digital Strategy

POWELL MANAGER GOVERNANCE

Design, deploy and update your SharePoint, Teams, Yammer, Groups and Powell Hub environments in a streamlined and automated way.

- No-code or low-code solution
- Template builder
- Automated deployment
- Control & update simply your deployed environments

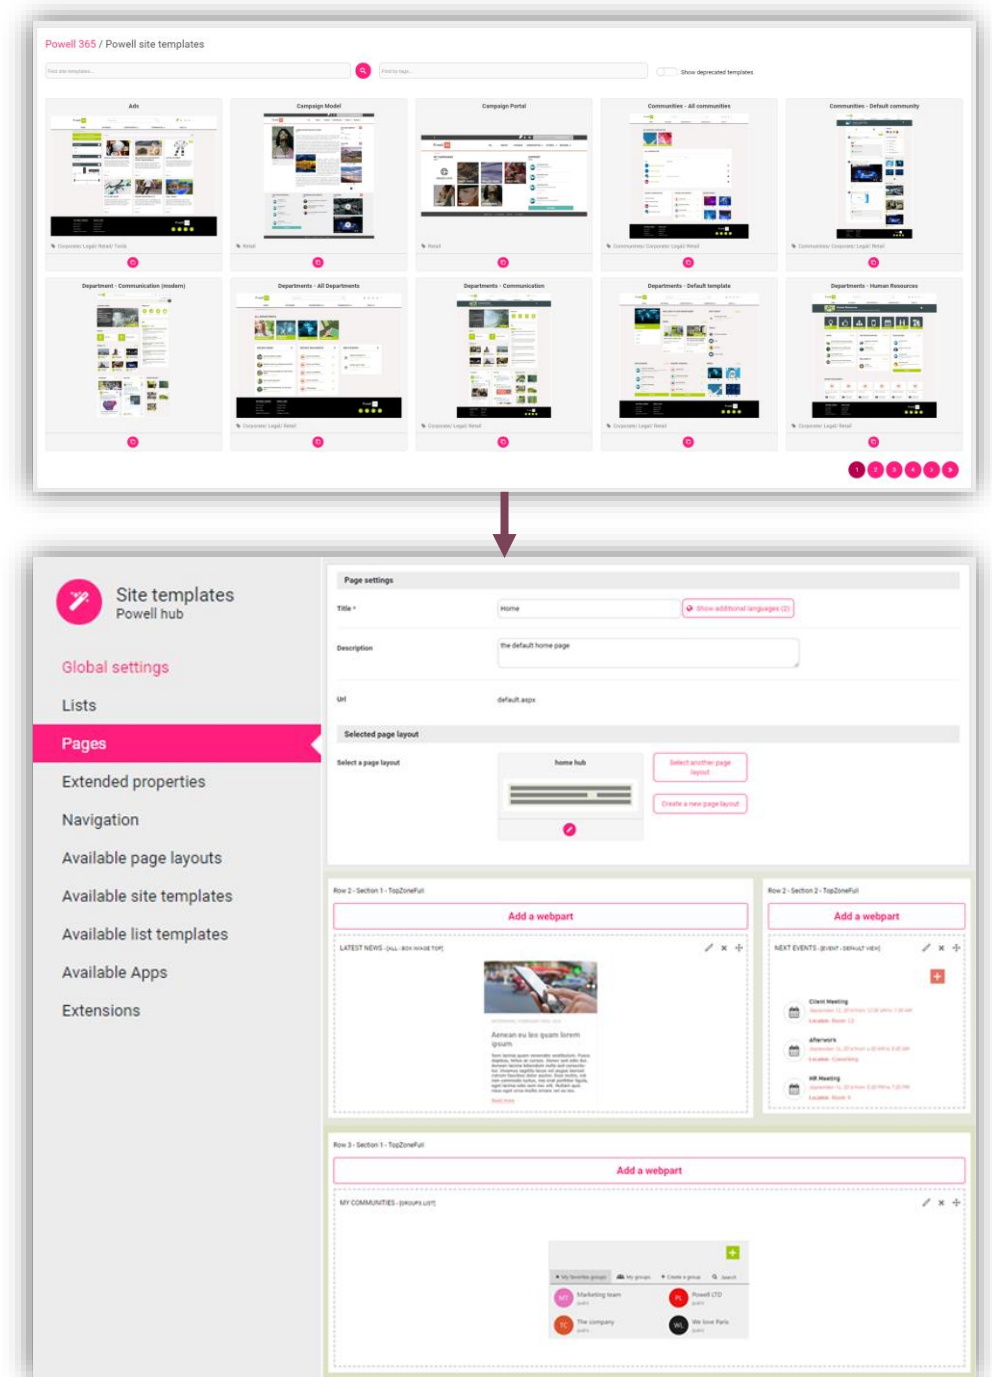

MAIN FEATURES POWELL MANAGER

#1 MANAGE YOUR TEMPLATES

Create your templates simply with no-code or use pre-built Powell Software templates

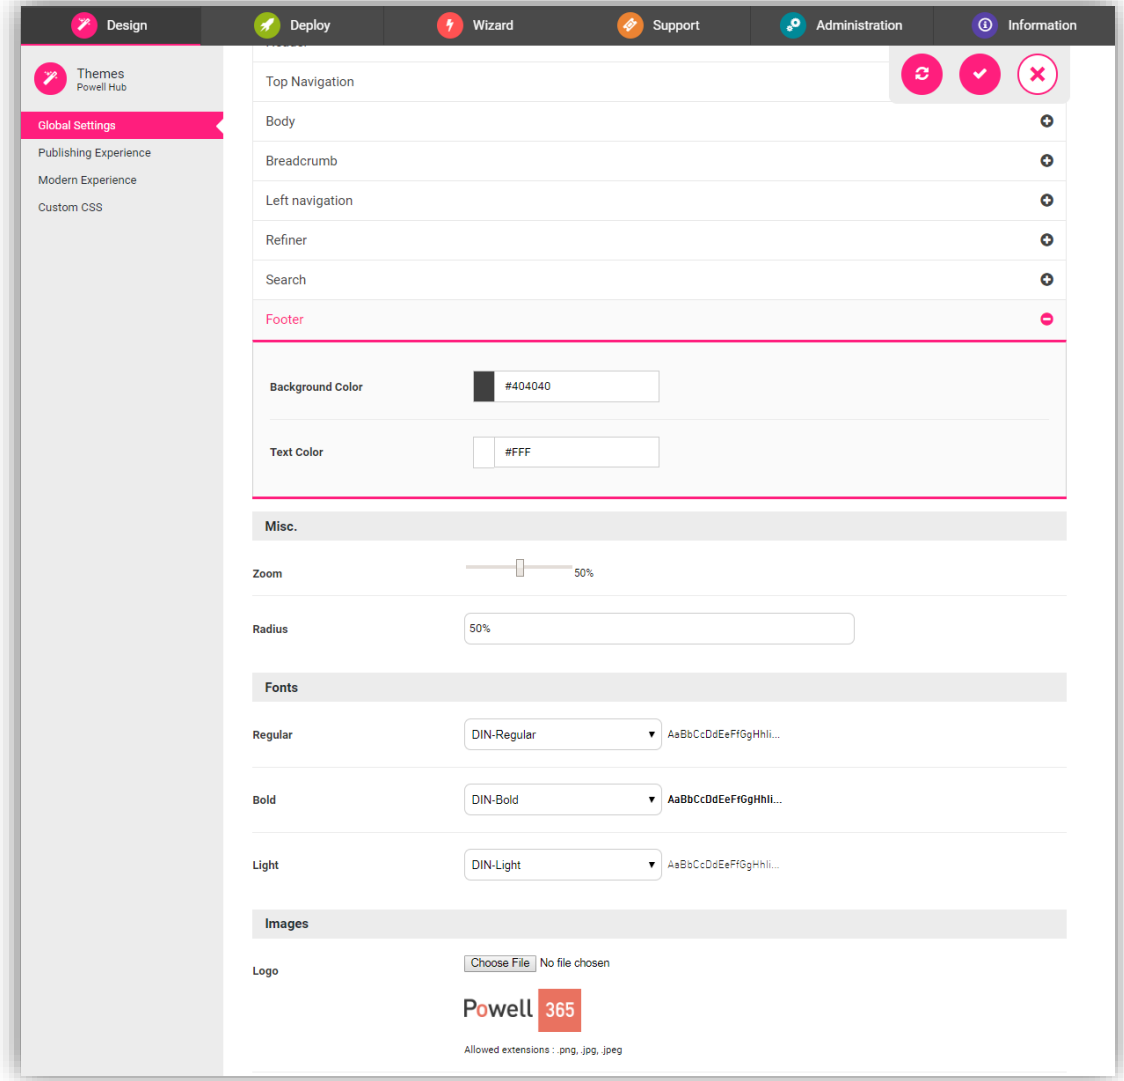

- SharePoint Sites (modern & classic)
- Teams and Groups Templates
- Powell Hub Pages
- Powell Mobile App Pages

#2 MANAGE YOUR DESIGN

Use one of our existing designs with your brand colors and logo or create your own design

- Global theme
- Header templates
- Footer templates
- Display templates for the widgets

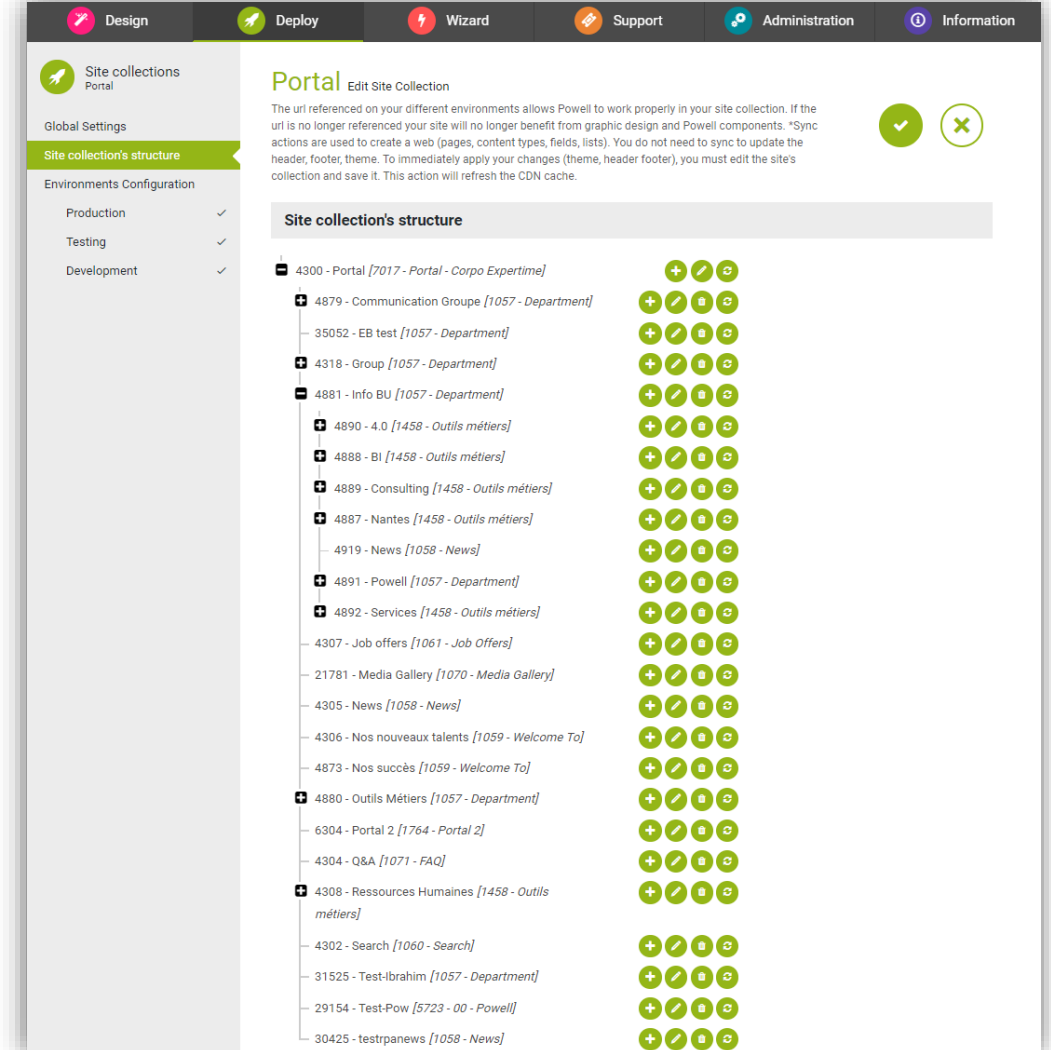

#3 MANAGE YOUR INFORMATION ARCHITECTURE

Create your Digital Workplace / Portal structure

- SharePoint structures including Site Design with Site Collections and Sub-Sites
- Available apps and pages in Powell Hub
- Available pages in Powell Mobile App

For Powell Hub:

- Manage your App Store
- Manage your User Profile

Portal Edit Site Collection

The url referenced on your different environments allows Powell to work properly in your site collection. If the url is no longer referenced your site will no longer benefit from graphic design and Powell components. *Sync actions are used to create a web (pages, content types, fields, lists). You do not need to sync to update the header, footer, theme. To immediately apply your changes (theme, header footer), you must edit the site's collection and save it. This action will refresh the CDN cache.

Site collection's structure

- 4300 - Portal [7017 - Portal - Corpo Expertise]
- 4879 - Communication Groupe [1057 - Department]
- 35052 - EB test [1057 - Department]
- 4318 - Group [1057 - Department]
- 4881 - Info BU [1057 - Department]
- 4890 - 4.0 [1458 - Outils métiers]
- 4888 - BI [1458 - Outils métiers]
- 4889 - Consulting [1458 - Outils métiers]
- 4887 - Nantes [1458 - Outils métiers]
- 4919 - News [1058 - News]
- 4891 - Powell [1057 - Department]
- 4892 - Services [1458 - Outils métiers]
- 4307 - Job offers [1061 - Job Offers]
- 21781 - Media Gallery [1070 - Media Gallery]
- 4305 - News [1058 - News]
- 4306 - Nos nouveaux talents [1059 - Welcome To]
- 4873 - Nos succès [1059 - Welcome To]
- 4880 - Outils Métiers [1057 - Department]
- 6304 - Portal 2 [1764 - Portal 2]
- 4304 - Q&A [1071 - FAQ]
- 4308 - Ressources Humaines [1458 - Outils métiers]
- 4302 - Search [1060 - Search]
- 31525 - Test-Ibrahim [1057 - Department]
- 29154 - Test-Pow [5723 - 00 - Powell]
- 30425 - testpanews [1058 - News]

#4 DEPLOY YOUR PORTAL AND UPDATE OVER TIME

Deploy your configuration in a simple click

Three available environments:

- Development
- Testing
- Production

Towards four possible targets:

- Microsoft SharePoint
- Microsoft Teams
- Powell Hub
- Powell Mobile App

**When new requirements come up, update
your intranet portal, in a few simple clicks!**

#5 EXTEND WITH YOUR CUSTOM DEVELOPMENTS

We support “plug & play” deployment of all custom development and integration

SharePoint:

- Office Dev PnP schemas
- Site script for Site Design
- SPFx packages for
 - Web parts
 - Header
 - Footer
 - Custom extensions
 - Theme

Powell Hub & Powell Mobile App:

- JavaScript and CSS custom development

```
1 {  
2   "$schema": "schema.json",  
3   "actions": [  
4     {  
5       "verb": "createSPList",  
6       "listName": "Customer Tracking",  
7       "templateType": 100,  
8       "subactions": [  
9         {  
10          "verb": "setDescription",  
11          "description": "List of Customers and Orders"  
12        },  
13        {  
14          "verb": "addSPField",  
15          "fieldType": "Text",  
16          "displayName": "Customer Name",  
17          "isRequired": false,  
18          "addToDefaultView": true  
19        },  
20        {  
21          "verb": "addSPField",  
22          "fieldType": "Number",  
23          "displayName": "Requisition Total",  
24          "addToDefaultView": true,  
25          "isRequired": true  
26        },  
27        {  
28          "verb": "addSPField",  
29          "fieldType": "User",  
30          "displayName": "Contact",  
31          "addToDefaultView": true,  
32          "isRequired": true  
33        },  
34        {  
35          "verb": "addSPField",  
36          "fieldType": "Note",  
37          "displayName": "Meeting Notes",  
38          "isRequired": false  
39        }  
40      ]  
41    },  
42    "bindata": { },  
43    "version": 1  
44  ]  
45 }
```

Architecture Overview

GLOBAL WITH POWELL HUB

POWELL MANAGER CONCLUSION

POWELL MANAGER

ONE PAGE BENEFITS FOR SHAREPOINT DEPLOYMENT

Design your SharePoint structures in a central repository in a couple of clicks

- Content types, list, page or list templates, themes, navigation bars, site collections, you name it! All your SharePoint objects are created straightaway with no code

Deploy wherever you want – depending on what your business stakeholders need

- Within one or multiple Office 365 tenants, your workplace configurations are available to all your teams right away, when they need them

Evolve your Digital Workplace with no delay!

- In a couple of clicks, you can edit a template and update all the websites where the template is used!

Adapt to your SharePoint Strategy: Out of the Box, custom development or Powell 365 enabled

- Powell Manager can design SharePoint Out of the Box structures, manage your SPFx extensions or make the most of Powell 365 features. This is your choice!

POWELL MANAGER BUSINESS BENEFITS FOR IT DEPARTMENTS

Accelerate time to market

- ✓ Simplify and accelerate design – No wireframe / No tunnel effect
- ✓ Significantly reduce testing phase – Improve delivery quality
- ✓ Apply changes immediately across all your portals

Save costs

- ✓ Evergreen – We manage all Office 365 updates
- ✓ Incidents are solved immediately without any redeployment
- ✓ Reuse designed components – Industrialize
- ✓ Standardize your information architecture

Focus on key value tasks

- ✓ Address business needs
- ✓ Define governance
- ✓ Improve information architecture
