

# AMAZON MARKETPLACE CONNECTOR

for Microsoft Dynamics 365  
for Finance & Operations

ESYÜN

Our **Amazon Marketplace Connector** offers a fast, flexible and targeted way to position the entire product range in Amazon. Your profit: The transfer of product lists, stocks, sales and customer data as well as prices takes place automatically from the Microsoft Dynamics 365 ERP system into the Amazon Marketplace.

## YOUR CHALLENGE

As an Amazon seller, you know what Amazon Marketplace has in store for you. Through Amazon, you can showcase your products to millions of people and maximize your sales. However, many companies still upload their products manually and have to adjust inventories manually. This process is not only error-prone, but also time-consuming and therefore costly.

## OUR SOLUTION - THE AMAZON MARKETPLACE CONNECTOR

Imagine being able to control your entire Amazon business from your ERP system. With our Amazon Marketplace Connector for Dynamics 365 for Finance & Operations this is now possible! You get a fully integrated app that automates and simplifies your Amazon management - without any error-prone middleware. Perform even better in the world's largest marketplace and get an app which ...

- can be integrated directly into the D365 Retail Module without middleware.
- supports all Amazon Marketplaces worldwide.
- allows the connection of several Amazon merchants.
- supports both Fulfillment by Amazon & and Fulfillment by Merchant.

Microsoft  
Dynamics 365

The **Amazon Marketplace Connector** App enables the central administration of all products and Amazon marketplaces via Microsoft Dynamics 365 for finance and operations, Enterprise Edition. The Amazon channel is fully integrated into the ERP system and does not require separate maintenance.

## EASY INSTALLATION

Our Amazon Marketplace Connector is available in Microsoft AppSource and can be installed directly into the Retail module as an app. An intermediate application is not required. The app was designed for Microsoft Dynamics 365 for Finance & Operations.

## YOUR BENEFITS

Save time from now on! You get a flexible app with many advantages:

- ✓ Synchronizes stocks in real time
- ✓ Books sales automatically
- ✓ Books and displays all Amazon fees
- ✓ Automates the import of orders in Dynamics 365
- ✓ Shows all VAT settings via Dynamics 365
- ✓ Avoids duplicates when creating customers
- ✓ Supports returns management
- ✓ Supports sellers SKU and Amazon ASIN
- ✓ Enables transfer of products from D365 to Amazon Marketplace
- ✓ Allows different products per marketplace and merchant
- ✓ Allows different prices for each marketplace and merchant

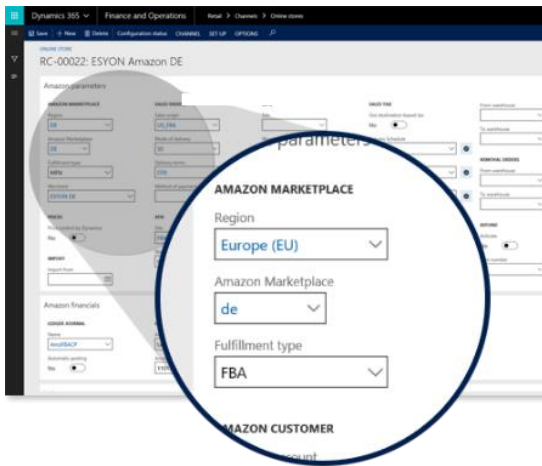

Thanks to the integrated Amazon Marketplace Connector, we can reach our customers directly and increase our sales. We benefit from effective automation where it is needed. This app is a win!
