

ZAP TEAM CALENDAR

For Microsoft Dynamics 365 Sales & Customer Service CRM

View all activities of team (tasks, phone calls, appointments, emails) from an easy-looking calendar view within Microsoft Dynamics 365 CRM

Our behaviour is influenced by how easy or difficult we perceive an action to be. An easy-looking calendar is more likely to gain a positive, visceral reaction in comparison to a plain list of activities as displayed by CRM.

Zap Team Calendar helps users manage activities (tasks, phone call, appointment, etc) from a Calendar View from within CRM. The activities can be filtered by activity type or activity status or even by users.

FEATURES

- **Get a great visual overview of your as well as team's activities**
- **Filter the activities based on activity type (task, appointment, phone call, email etc.) or status (open, scheduled, completed, etc.)**
- **Filter the activities based on users or team**
- **Color coding of activities to easily differentiate between different activity types**
