

# CORAX wms, built on Microsoft Azure, ensures you get efficient and real-time handling and traceability of all logistical flows within all types of warehouses

## MICROSOFT AZURE SOLUTION BUILDER PROFILE: DAVANTI WAREHOUSING

Davanti Warehousing specializes in warehouse logistics and develops its own state-of-the-art warehouse management systems (WMS). Davanti brings 30 years of logistics knowledge and experience to each and every implementation process. Our cloud WMS, CORAX, is based on Microsoft Azure. CORAX is a perfect fit for all kinds of warehouses in all business lines.

### WHAT WE OFFER

The CORAX Warehouse Management System ensures efficient real-time handling and traceability of all inbound, storage, and outbound flows within all types of warehouses. CORAX is designed from an end-user perspective. Intuitive screens and functions enable fast implementations and an optimal user experience.

CORAX wms is completely web-based and cloud-based, making major investments in servers and IT infrastructure unnecessary. CORAX is available via any web browser, on any device, and from any location. It is perfectly applicable for both private warehouses and logistics service providers.

Davanti strives for customer care in the field of technology. We take care of the IT infrastructure for CORAX. Our customers utilize the scalability of Microsoft Azure, so when your company grows, CORAX can grow at the same pace without performance issues. With CORAX, you are ready for the future.

CORAX is a standard solution and can be implemented quickly. We maintain a strict one-version philosophy with a clear roadmap that Davanti outlines together with its customers. Updates take place on a regular basis. Integration with other applications is facilitated by standardized connections.

### WHAT OUR CUSTOMERS ARE SAYING

“Davanti’s warehouse management systems give NewCold the competitive edge we strive for in our eight cold storages on three continents.” – Piet Meijjs, VP Business Development, NewCold

# Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

## KEY USE CASES

### WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

### CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

### BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

### MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

### MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

### FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

### ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

### DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

### GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
