Powering Enterprise Transformations®

# Discover the ‘DNA’ of Your Domino Applications

PowerBA™ Analyzer is an automated solution for inspecting and analyzing Domino servers and applications. PowerBA Analyzer provides key insights on the design, functionality, categorization, content, usage and security of your Domino databases. PowerBA Analyzer will help you accurately determine the path, time and cost of migrating your Domino applications.

Discover the specific data you need to plan your transformation journey.

**COLLECT**  
Applications, Servers & Integrations

- > Inspects your Domino servers, their applications and any integrations your applications have to other Domino or third-party applications
- > Gathers information to specifically target certain code patterns that will factor into the time and cost of migrating your applications

**REPORT**  
Insights to Guide Transformation

- > PowerBA Analyzer produces the following reports for rationalizing your migration plan (view samples on our website):
  - Servers and Applications
  - Documents and Content
  - Users and Usage
  - Database Design and Functionality
  - Database Security
  - Database Categorization and Disposition
  - Database Details

**ANALYZE**  
Complex Code, Grouping & Usage

- > Analyzes the usage and code complexity of each of the applications
- > Applications can be grouped and prioritized to fit your migration strategy
