Democratising Data

Connecting **data**, not **systems**, is **better**, **faster** and **cheaper**

All your data, from all your systems. Connected together and available as a single shared resource.

What is Sesam?

Sesam is an Integration Platform-as-a-Service using a unique Datahub approach for collecting, connecting and sharing data. With Sesam, data can quickly be connected, shaped and used, without changing the systems that own the original data. In this way all the valuable data within your company will be available for the whole organization.

Why use Sesam?

Integrating systems for data exchange is complex. Switching to data driven integration provides significant improvement in terms of:

- Cost
- Time to delivery
- Reduction of complexity

Integrating data connections through a Data Driven Data Hub provides a mature foundation on which to create and iterate value added services across all your organization's data.

Fully Data Driven

- Unique data driven architecture
- 360 degree Global Datasets
- Simple and flexible data transformation

Create, use and enrich powerful connections across all your data

Multi-Purpose

- Data integration, ETL
- Data Sharing
- Process Orchestration and Automation
- Enabling ML and Analytics

Integrate and share data easily, where you need it, when you need it.

Platform as a Service

- Pay as you go
- Available immediately in the cloud
- Scalable
- Secure

Create new integrations within minutes, scaling out as you grow.

Data driven architecture stands the test of time

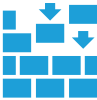

Our customers continue to build on top of data driven architecture

- Sesam Unique Data hub architecture stands the test of time
- Our customers continue building upon this architecture year after year
- Mature architecture supports your growth

Our customers save time and money

- Sesam enables increased iterative speed of deliveries
- Time to delivery of new data services is drastically reduced
- Significant costs savings when integrating systems with Sesam

Our customers reduce complexity

- Sesam delivers complex integrations with a simple architecture
- Growth in total number of API end points remains under control
- Ongoing maintenance and operations costs are reduced

Our promise to you

Sesam will reduce the time and cost to integrate and deliver data driven services in your organisation.

An offer to get you started

- Subscribe to Sesam in the cloud
- You only pay for what you use
- Easily scalable
- Flexibility and low risk to get started
- Proof of value projects to help convince decision makers
