

Monocept REDACT is an Aadhaar Masking solution, built on top of MS Azure, that uses OCR to deliver masked Aadhaar within seconds

MONOCEPT CONSULTING

Monocept *REDACT*, an Aadhaar masking solution, extracts information from images of Aadhaar card using OCR to allow organizations to use Aadhaar for authentication purposes while keeping customer's data private and secure. Using Monocept REDACT, you can remain compliant with the recent IRDA Circular which states that all Aadhaar cards should be masked.

WHAT WE OFFER

Input: Any image with Aadhaar number on it

Output: Same image with first eight digits masked

Monocept Redact is a cloud-based intelligent detection system that uses Azure Cloud capabilities to deliver masked Aadhaar as per regulatory compliance. It extracts information from images of Aadhaar card using OCR. It uses APIs for business applications to help you mask legacy and real-time records without storing any data.

Monocept Redact uses MS Azure cognitive services to extract words into machine-readable character streams. It can easily integrate itself with the client's system while providing accurate results for masked Aadhaar. It allows organizations to use Aadhaar card for authentication purposes while keeping customers data private and secure.

Using Computer Vision API, Monocept Redact can generate a high-quality storage-efficient image and modify it to best suit the client's need for size, shape, style and masking. It provides the client an easy solution of masking legacy Aadhaar data as well as real-time masking within seconds using APIs for integrating with business applications.

Monocept Redact allows the client to now use any Aadhaar format like full leaflet, m-Aadhaar, scanned copy, form with Aadhaar number printed, etc. and any image format for masking Aadhaar like JPEG, JPG, PDF, TIFF, and PNG. Thus, Redact allows you to save time and effort by using photographed Aadhaar instead of copying it.

CUSTOMER SUCCESS

Master Capital Services Ltd., one of the leading financial services companies in India, required an easy to integrate Aadhaar Masking Solution for their customer onboarding journey to mask and store the Aadhaar data. Redact provides results with high precision and accuracy to work on their legacy data as well as real time Aadhaar records.
