Callinspector

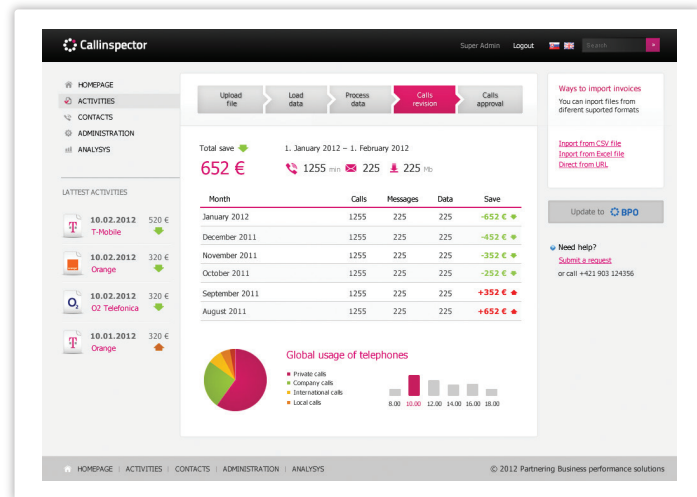

Telecom Expense Management

What is Callinspector

Callinspector - the telco expense management solution is designed for consolidation of a multitude of electronic statements from telco operators, their analysis, reporting and provisioning of information via easy to use Web 2.0 user interface to telco end users, managers and controllers; with sole purpose – continues costs optimizations & savings!

“Callinspector will save you 25% of costs! „

How does it work?

1.
Upload your invoices,
Quick & easy job

Upload your electronic invoices of all your company cell phones and fixed lines into Callinspector. Your operator provides these upon request and they come almost free.

2.
Let the engine works,
Involve your users

Callinspector's intelligent self-learning mechanism will consolidate and analyze your invoices using a number of business rules and previously remembered call patterns to identify potential savings and suggest optimizations.

3.
Understanding your
spendings, Monitor & Optimize

Callinspector gives you and your users a comprehensive overview of usage, shows areas for potential savings on telecom services and suggests optimization of particular items.

Identify and reduce cost for private usage of your company's telco assets.

A phone usage overview for each employee, reporting and approval process for each manager.

Optimize! With Callinspector you will swiftly find out whether your current calling plans are optimally used.

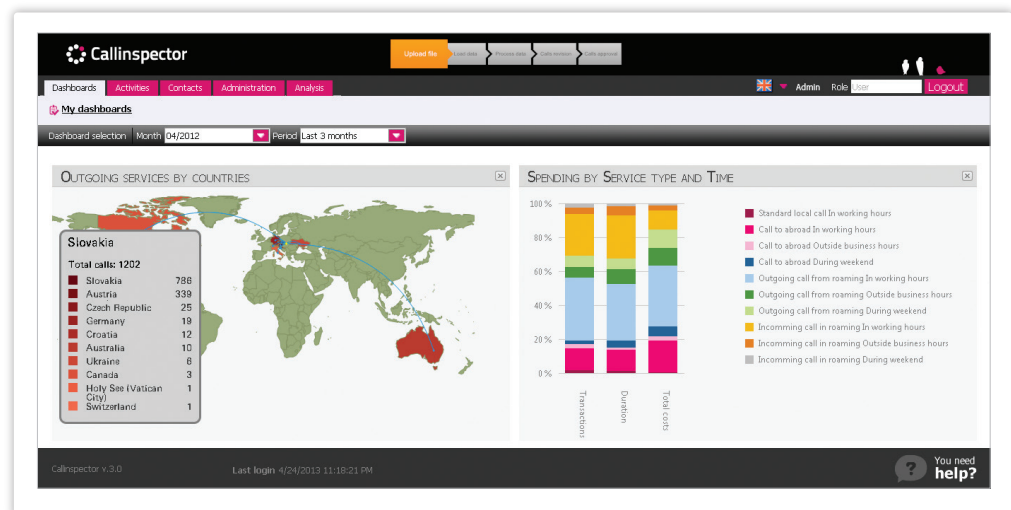

Use the opportunity to actively educate your employees on optimal usage of telco assets.
