AXOnePay

A Comprehensive Payroll Solution
for your Organization

AXOnePay on Dynamics 365 for Operations

As businesses grow, so do their HR and payroll problems. Often it is not just about a larger number of employees, the problems could be manifold if they have a myriad of HR & Payroll activities. Complexities in the Payroll requirements requires a comprehensive and effective Payroll Management System. As the number of variables grows each time you are processing salaries, the chances of errors creeping in increase. The system grows with you as your business grows, keeping your organization nimble and focused on outperforming competitors. The information AXOnePay provides gives HR a seat at the table by giving executives visibility into strategic indicators like employee turnover and retention.

Why Dynamic Netsoft's AXOnePay

AXOnePay has been designed to maximize the efficiency and output of Dynamics AX and Dynamics 365 for Operations users. Have an effective tracking of all your employee details, Employee Dependents and family members & Documents, their attendance, Overtime, performance linked incentives, leaves, expense reimbursements as well as various deductions mandated by labour and tax laws as such. Use the effective filters to process the payroll through a workflow automation and approvals thereby reducing the manual intervention during the Payroll process. Seamless transaction processing with the General Ledger module's flexible account structure for dimension accounting gives a comprehensive employee statement of accounts. AXOnePay offers to generate comprehensive reports, including pre-and post-payroll process analysis of earnings, benefits, deductions, accruals, and taxes for the pay period. Use the EFT functionality to generate the Bank Files and eliminate the time and cost of printing and distributing pay checks.

AXOnePay - Overall Feature Highlights
